VERIFICATION REPORT

CLIENT NAME: Ark Data Centres

PROPERTY ADDRESS: Union Park,
North Hyde Gardens,
Hayes,
UB3 4QQ

INSPECTION DATE: N/A

1.0 INSTRUCTIONS

- 1.1** Colliers Project and Building Consultancy (Colliers) was instructed by Ark Data Centres to complete a Verification Report for the initial phase of a redevelopment at a site referred to as Union Park, North Hyde Gardens, Hayes, UB3 4QQ. These works have been completed in connection with the construction of a data centre for Data Centre 1 (Union Park 1/UP1), Energy Centre 1 (EC1), the Visitor Reception 1, and the Electrical Substation only. Verification reports for subsequent phases will be supplied separately. A copy of the phasing plan for the site is included within Appendix 1.

2.0 AIMS AND OBJECTIVES

- 2.1** The aims of this report are:
- Confirm that the remediation requirements, set out by Paragon Building Consultancy (now Colliers) in the Remediation Strategy (Reference: 20.0023/CK/LSG Revision E. Dated: 2 September 2021) have been completed to an acceptable standard.
 - Confirm that risks to human health, controlled waters and the property are reduced to an acceptable level to allow the discharge of relevant planning conditions.
- 2.2** The aims are to be completed by:
- Completing site inspections throughout development to monitor progress and review information provided by the main contractor relating to unexpected contamination, the installation of the potable water supply network, decommissioning of boreholes, installation of a gas membrane and imported soils.

3.0 SCOPE OF WORKS

3.1	<p>The scope of the report was agreed with the client and comprised the following:</p> <ul style="list-style-type: none"> • Site inspections throughout the development; • The review of the potable supply pipework information; • The review of the gas membrane installation documentation; • The review of the imported soil proposal; and • The provision of a verification report detailing completion of the above.
------------	---

4.0 BACKGROUND

4.1	<p>Site Location</p>
4.1.1	<p>The site is centred around National Grid Reference 510423, 179309 and is approximately 3.5Ha. The approximate elevation of the site is 31m Above Ordnance Datum (mAOD). Site information gathered during the preliminary report is summarised below and a Site Location Plan is provided as Figure 1 in Appendix 1.</p>
4.1.2	<p>At the time of the original reporting, the site comprised five main parcels of land that were predominantly used for commercial and industrial uses, which are summarised below.</p> <ul style="list-style-type: none"> • Vodafone; • British Airways (BA); • Abellio Bus Garage (Abellio); • Addison Lee; and • FM Conway.
4.1.3	<p>The wider surrounding area comprises industrial and commercial land use, with a rail line bounding the north of the site. The River Crane (also known as the Yeading Brook) runs through the eastern part of the site. In addition, the Grand Union Canal is off site and located within 5m of the southern boundary of the site, beyond a towpath.</p>
4.1.4	<p>At the time of writing the original reports, the former BA building had been demolished to create a large open area of hardstanding with stockpiles of crushed concrete. Furthermore, the Vodafone, Addison Lee and Abellio buildings were planned to be demolished.</p>

4.2	Proposed Development and Planning
4.2.1	The proposed development includes: “Site clearance and preparation, including the demolition of remaining buildings, and the redevelopment of the site to provide: a new data centre, two MV Energy Centres, an HV Sub-Station, a visitor reception centre, plant, the creation of a new footpath and cycleway link to the canal towpath, works to the highway, car parking, cycle parking, associated infrastructure, enclosures and necessary physical security systems, hard and soft landscaping (including works to the River Crane) and ancillary uses, as well as associated external works”.
4.2.2	Planning permission was granted for this development by the London Borough of Hillingdon under planning reference 75111/APP/2020/1955.
4.2.3	<p>Application 75111/APP/2020/1955 was granted with the following environmental planning conditions:</p> <ul style="list-style-type: none"> • Condition 31: Provision of a Phase 1, Phase 2, Remediation Strategy and Verification Report. • Condition 32: Provision of a Piling Works Risk Assessment. • Condition 33: Provision of a Remediation Strategy. • Condition 34: Provision of a Verification Report. • Condition 35: Completion of Long Term Groundwater Monitoring. • Condition 36: Completion of a Discovery Strategy. • Condition 38: Decommissioning of Boreholes.
4.2.4	This report meets the final requirements of Conditions 31, 34, 35, 36 and 38 (for Phase 1). The remaining conditions have already been discharged (for Phase 1).
4.2.5	Subsequently, an additional planning application was made to include the former Abellio plot: 75111/APP/2022/1007.
4.2.6	<p>Application 75111/APP/2022/1007 was granted with the following environmental planning conditions:</p> <ul style="list-style-type: none"> • Condition 27: Provision of a Piling Works Risk Assessment. • Condition 28: Provision of a Phase 1, Phase 2, Remediation Strategy and Verification Report. • Condition 29: Provision of a Remediation Strategy. • Condition 30: Provision of a Verification Report. • Condition 31: Completion of Long Term Groundwater Monitoring. • Condition 32: Completion of a Discovery Strategy.
4.2.7	The above application relates specifically to the former Abellio plot. As such, these will be met as part of the later stages.
4.2.8	At present, Data Centre 1 (Union Park 1/UP1), Energy Centre 1 (EC1), the Visitor Reception 1, and the Electrical Substation. As shown within the phasing plan in Figure 3, Appendix 1.

<p>4.3</p>	<p>Summary of Previous Reports</p>
<p>4.3.1</p>	<p>Colliers (formerly Paragon) have completed the reports listed below:</p> <ul style="list-style-type: none"> • Paragon, 2021. Phase 1 Preliminary Risk Assessment. Reference: 19.0633/CB/NW Revision D. Dated: 11 November 2021. • Paragon, 2021. Phase 2 Ground Investigation Report. Reference: 20.0023/CB/DCN Revision D. Dated: 11 November 2021. • Paragon, 2021. Detailed Quantitative Risk Assessment (DQRA). Reference: 20.0023/CK/KJH Revision C. Dated: 11 November 2021. • Paragon, 2021. Remediation Strategy. Reference: 20.0023/CK/LSG Revision E. Dated: 2 September 2021. • Paragon, 2021. Piling Works Risk Assessment. Reference: 21.0198/CB/NW. Dated: 22 February 2021. • Paragon, 2021. Groundwater Monitoring Initial Summary. Reference: 211423/CB/NW. Dated: 21 December 2021. • Paragon, 2022. Groundwater Monitoring Report 2. Reference: 211423/AH/GWR 2. Dated: 17 March 2022. • Paragon, 2022. Groundwater Monitoring Report 3. Reference: 211423/CB/GWR 3. Dated: 13 July 2022. • Paragon, 2022. Groundwater Monitoring Report 4. Reference: 211423/CB/GWR 4. Dated: 12 September 2022. <p>4.3.2 The British Geological Survey (BGS) mapping for the site identified it is underlain by artificial ground (worked ground), and subsequently the Lynch Hill Gravel Member, over the London Clay Formation.</p> <p>4.3.3 The boreholes drilled onsite encountered hardstanding over Made Ground (cohesive and granular lenses) to a maximum depth of 5.8mbgl over Lynch Hill Gravel (cohesive and granular lenses) to 10.2mbgl over London Clay Formation to a maximum drilled depth of 35mbgl.</p> <p>4.3.4 Groundwater was encountered in the Lynch Hill Gravel at around 29mAOD in the centre of the site and closest to the river at 26.76-26.57mAOD. In comparison, the base of the River Crane channel adjacent to the site is around 25.00mAOD based on Environment Agency LiDAR data. Perched groundwater was also encountered in the Made Ground and London Clay.</p> <p>4.3.5 The soil and groundwater samples recovered from the boreholes were submitted for laboratory testing for a range of contaminants in line with the historical uses of the site and findings of the previous investigations.</p> <p>4.3.6 The results identified asbestos fibres were present within the shallow Made Ground across the site. The extensive hardstanding mitigates risks to site users in the current site layout, however when construction commences and hardstanding is broken out there will be a potential release of fibres to air. As such, careful management of the soils will be required throughout the construction phase to mitigate risks to construction workers and off-site receptors.</p>

4.3.7 The concentrations of Polycyclic Aromatic Hydrocarbons (PAH) and Total Petroleum Hydrocarbons (TPH) within the groundwater exceeded the Environmental Quality Standard (EQS), which was used to assess the risks to the River Crane/Yeading Brook (considered the most sensitive Controlled Water assessment). However, a Detailed Quantitative Risk Assessment (DQRA) was subsequently undertaken using the Remedial Targets Methodology which has shown that the site does not pose any significant risks to Controlled Waters (River Crane). As such, following the site investigations and DQRA undertaken to date it is considered unlikely that the contamination identified in site soils or groundwater would warrant remediation. Also, due to the presence of high levels of Ammonia already in the River Crane, it is unlikely that any remediation carried out on the Bulls Bridge would result in a measurable benefit to the River Crane.

4.3.8 The results from the gas monitoring and vapour analysis have identified slightly elevated concentrations of carbon dioxide, and elevated concentrations of the naphthalene in one location. As such, there is a potential gas and vapour risk.

4.4 Summary of Conceptual Site Model

4.4.1 Based on the foregoing, a conceptual site model has been prepared to reflect the current conditions of the site. This is presented in Table 1.

4.4.2 *Table 1. Conceptual Site Model*

Receptor	Potential sources	Pathways	Risk	Justification
Human Health				
Construction and maintenance workers / Users of the site	Organic and metal contamination	Direct contact, ingestion, and inhalation via outdoor soils or translocated soil and dust indoors.		Low to Moderate risk: Ingestion, inhalation and dermal contact with contaminated soils in excavations or stockpiles cannot be discounted. Personal Protective Equipment (PPE) and Risk Assessments and Method Statements are required.
	Ground gas and vapours	Inhalation, Migration through granular and fractured soils into confined spaces.		Low to Moderate risk: Inhalation of vapours from contaminated soils or groundwater below the site cannot be discounted due to the historical use of the site and the extent of previously untested areas.
Future site users	Organic and metal contamination in soils and groundwater	Direct contact, ingestion, and inhalation of outdoor soils or translocated soil and dust indoors.		Low to Moderate risk: Inhalation of vapours from contaminated soils or groundwater below the site and contact with Made Ground in areas of soft landscaping may be possible.
	Ground gas and vapour	Inhalation, migration through granular and fractured soils into confined spaces.		Low to Moderate risk: Inhalation of vapours from contaminated soils or groundwater below the site cannot be discounted.
Offsite Residents (250m southwest)	Organic and metal contamination in soils, groundwater and gas	Direct contact, ingestion, and inhalation of outdoor soils or translocated soil and dust indoors.		Low risk: Residents 300m southwest are unlikely to be at risk from contaminants arising from the site as they will be cut off by the Grand Union canal. The likelihood for migration to properties a similar distance to the northwest is minimal given the considerable distance to the properties and several other areas of industrial land in between.

Table 1. Conceptual Site Model (Continued)

Receptor	Potential sources	Pathways	Risk	Justification
Property				
Site structures and services	TPH in site soils	Direct contact between soil and structures or services.		Low to Moderate risk: Direct contact of building materials including foundations and buried services with contaminated soils and groundwater is low to moderate based on laboratory testing.
	Ground gas and vapour	Migration through granular and fractured soils into confined spaces.		Moderate risk: The results of the investigation suggest that there is the potential for migration of gases and vapour through soil pore space and to the surface from underlying Made Ground and historical ground workings cannot be discounted.
Plants /Landscaping	Metals and organic contamination in soils	Root contact and uptake		Low risk: The results of the soil analysis have been compared to BS3882 and the risk to existing plants is low. However, a capping system is likely to be required due to the presence of asbestos within the shallow Made Ground.
Adjacent Property				
Building fabric of adjacent properties	Metals and organic contamination in soils	Soil leaching and migration and translocation as dust of soil contamination.		Low risk: Direct contact of building materials including foundations and buried services with contaminated soils and groundwater is low based on the low level of contaminants identified near to off-site property in the wider estate.
Groundwater				
Principal Aquifer	Metals and organic contamination in soils	Soil leaching and migration of potential soil contamination to dissolved phase in groundwater		Low risk: The assessment from the DQRA has determined that the site does not pose a significant risk to Controlled Waters.
Surface Waters				
River Crane/Yeading Brook (onsite) Grand Union Canal (5m south)	Leachable metals and organic contamination	Soil leaching and migration into drains and sewers which discharge into the ditch.		Low risk: The assessment from the DQRA has determined that the site does not pose a significant risk to Controlled Waters.

4.4.3 As such some degree of remediation was required to mitigate the risks.

4.5 Construction and Design Team

4.5.1 A summary of the Management Team working on the project is presented below.

4.5.2	<p>Table 2. Management Team</p> <table border="1"> <thead> <tr> <th>Name</th> <th>Role</th> <th>Notes</th> </tr> </thead> <tbody> <tr> <td>Ark Data Centres</td> <td>Client</td> <td></td> </tr> <tr> <td>Concert</td> <td>Project Manager</td> <td></td> </tr> <tr> <td>HDR / Hurley Palmer Flatt</td> <td>Principal Designer</td> <td></td> </tr> <tr> <td>Sweet Projects</td> <td>Main Contractor</td> <td>Main site</td> </tr> <tr> <td>JSM</td> <td>Main Contractor</td> <td>Separate instruction for Vodafone / Substation build</td> </tr> <tr> <td>Gallagher</td> <td>Subcontractor</td> <td>Groundworks</td> </tr> <tr> <td>Toureen</td> <td>Subcontractor</td> <td>Groundworks and Development of UP1, EC1 and Visitor Reception 1</td> </tr> </tbody> </table>			Name	Role	Notes	Ark Data Centres	Client		Concert	Project Manager		HDR / Hurley Palmer Flatt	Principal Designer		Sweet Projects	Main Contractor	Main site	JSM	Main Contractor	Separate instruction for Vodafone / Substation build	Gallagher	Subcontractor	Groundworks	Toureen	Subcontractor	Groundworks and Development of UP1, EC1 and Visitor Reception 1

5.0 REMEDIATION STRATEGY

5.1	<p>Remediation Strategy</p>
5.1.1	<p>The chemical analysis has identified asbestos within the soil and elevated concentrations of TPH and PAH within the groundwater. In addition, a potential gas and vapour risk has been identified. These impacts are considered to relate to the historical development of the site, which has a longstanding industrial legacy as a creosote works and power station. Therefore, to facilitate the development, the following recommendations were made:</p> <ul style="list-style-type: none"> • Site clearance and demolition including the removal of the generator / above ground tank in the Vodafone plot (completed in spring / summer 2020); • Personal Protective Equipment and health and safety controls; • Watching brief and discovery strategy in the event that previously unidentified contamination is encountered; • Ongoing monitoring of groundwater (a monitoring plan is included within this strategy); • Capping layers in soft landscaped areas; • Gas (methane and carbon dioxide) and vapour resistant membranes within future enclosed structures; • Asbestos control measures and materials management; • Barrier pipework for new drinking water supply pipework; • Decommissioning of boreholes; and • Piling Works Risk Assessment; and • Remediation and Verification reporting.

<p>5.2</p>	<p>Verification Plan</p>
<p>5.2.1</p>	<p>To confirm that the mitigation measures outlined by the Remediation Strategy are implemented, a Verification Plan has been produced and is included in detail within the following report. The strategy sets out the requirements of the main contractor(s) in terms of collating information during development and the responsibilities of an environmental consultant in reporting the findings of third-party verification activities. The verification plan involves:</p> <ul style="list-style-type: none"> • Recording the findings of a watching brief and any onsite control measures such as dampening down; • Recording findings and outcomes of a discovery strategy should unforeseen contamination be encountered; • Provision of photographs around the removal of the tank ; • Findings of inspections and compliance testing; • Maintenance and provision of duty of care records (for importation and exportation of materials); • Site photographs; • Provenance data for imported topsoil / subsoil; • Chemical analysis data of soils and ongoing groundwater and surface water sampling; • Verification records of gas / vapour protection including specification of the design and As Built drawings; • Concrete design specification; • Borehole decommissioning information; • Confirmation of drinking water supply pipework material used and records of any communication with the local water supply company; and • Records of any permits / exemptions (if relevant).

6.0 VERIFICATION WORKS

<p>6.1</p>	<p>Site Visits</p>
<p>6.1.1</p>	<p>In summary, Colliers are completing ongoing visits of the development site and records of each remediation item are being collated. Depending on the purpose of the visit, photographs, and/or soil or water samples were collected. In addition, several visits were completed for general update purposes, in which no sampling was required. A list of the verification visits is included below, and a selection of photographs is presented in Appendix 2:</p>

6.1.2

Table 3. Verification Visits

Number	Date	Description
1	21 September 2020	General Inspection
2	5 November 2020	General Inspection
3	19 November 2020	General Inspection

6	7 June 2021	Soil Testing Hayes
7	8 June 2021	Soil Testing Hayes
8	22 June 2021	MMP Soil Supervision
9	29 June 2021	MMP Soil Supervision
10	30 June 2021	MMP Soil Supervision
11	1 July 2021	MMP Soil Supervision
12	5 August 2021	Borehole Drilling (Groundwater Monitoring set up)
13	2 September 2021	Set up of vibration equipment
14	10 March 2022	Site Meeting
15	23 March 2022	Site Inspection
16	31 March 2022	Groundwater Sampling (Paragon Inspection)
17	24 June 2022	Japanese Knotweed Inspection
18	8 August 2022	Soil and groundwater sampling visit
19	2 June 2023	Site Inspection
20	13 July 2023	Site Inspection
21	25 July 2023	Site Inspection
22	1 November 2023	Verification Inspection
23	6 November 2023	Site Inspection
24	7 November 2023	Site Inspection

6.2 Tank Removal

6.2.1 The former Vodafone plot contained a back up generator and above ground fuel tank. This was removed as part of the enabling works by Erith. Photographs of the area following its removal are provided in Appendix 3.

6.3 Construction Management Plan

6.3.1 A Construction Management Plan was required as part of the planning submission. The document was submitted to the Local Authority as part of the planning application:

- Sweet Projects, 2021. Construction Management Plan. Dated: 28 May 2021.

6.3.2 The report identifies how the critical construction activities were to be undertaken, and specifically covers the environmental, public health and safety aspects of the development.

6.3.3 A decision notice is available on the planning portal (Ref: 75111/APP/2021/1515) that states that the requirements for Condition 20 (Construction Management Plan) have been met.

6.3.4 Separately, Sweet Projects undertake daily site inductions and briefings for workers on the contaminants that may be encountered during groundworks.

6.4 Watching Brief / Discovery Strategy

6.4.1 Sweet Projects has completed a Watching Brief throughout the development. A single source of unexpected contamination was identified during the initial groundworks and breaking out of below ground structures in 2021. This resulted in the presence of an area of black oil pooling on water.

6.4.2 Sweet Projects initiated the Discovery Strategy and Colliers visited the site to inspect and take samples. It was determined that the oily water was to be removed from site using tankers.

6.4.3 No other unexpected sources of contamination have been identified during the works. Toureen have prepared a covering email to Sweet Projects, stating they have not encountered any unexpected contamination.

6.5 Groundwater Monitoring

6.5.1 The reports on long term groundwater quality have been written under separate cover between 2021 and 2022. The monitoring was undertaken to determine whether piling impacted the River Crane. A summary of the monitoring visits is presented below:

6.5.2 **Table 4. Monitoring Visits Completed**

Monitoring Round		Borehole Reference		
		BH101	BH102	BH103
Baseline				
05/08/21	Initial Baseline Visit	✓	✓	✓
During Piling				
19/08/21	Round 1	✓	✓	✓
31/08/21	Round 2	✓	✓	✓
14/09/21	Round 3	✓	✓	✓
30/09/21	Round 4	✓	✓	✓
13/10/21	Round 5	✓	✓	✓
28/10/21	Round 6	✓	✓	✓
10/11/21	Round 7	✓	✓	✓
23/11/21	Round 8	✓	✓	✓
07/12/21	Round 9	✓	✓	✓
20/12/21	Round 10	✓	✓	x ¹
05/01/22	Round 11	✓	✓	✓
19/01/22	Round 12	✓	✓	✓
31/01/22	Round 13	✓	✓	✓
17/02/22	Round 14	✓	✓	✓
Post Piling				
31/03/22	Round 15	✓	✓	✓
26/05/22	Round 16	✓	✓	✓
29/06/22	Round 17	✓	✓	✓
25/06/22	Round 18	x ²	✓	✓
17/08/22	Round 19	✓	✓	✓

Note To Table:

¹BH103 ran dry during monitoring on round 10 so no sample was taken during this visit.

²BH101 was inaccessible during monitoring round 18 due to stockpiles of soil.

It should be noted that no monitoring visits were completed in April due to illnesses within the monitoring team.

6.5.3 In summary, the results of the groundwater monitoring have shown that the contaminant concentrations are in the same magnitude as the concentrations identified prior to piling (i.e. same as the DQRA and the baseline monitoring round). Furthermore, the monthly monitoring has shown a broad decrease in concentrations of contaminants over time. Based on the above, it was concluded that it is unlikely that piling activities or groundworks have impacted the River Crane.

6.6 Capping Material

6.6.1 Due to the presence of contamination encountered within the shallow Made Ground during the Phase 2 Ground Investigation, it was recommended that areas of soft landscaping would be surfaced with a clean cover layer. This was to comprise:

6.6.2 *Table 5. Composition of Capping Layer*

Layer	Minimum Thickness
Topsoil	150
Subsoil	450
Geotextile	Terram 1,000 or similar

6.6.3 At the time of writing, the areas of soft landscaping were not ready to be tested as the soil had not been imported. Instead, Sweet Projects have indicated the source of topsoil they will be importing and provided test certificates. These certificates are presented in Appendix 5.

6.6.4 It is proposed that the verification testing of the cover system will be completed under separate cover.

6.7 Gas Protection Measures

6.7.1 Gas protection measures were determined to be required as part of the remedial works. It was determined that a gas and vapour membrane would be sufficient. The gas and vapour membrane has been fitted to all buildings. A layout plan from Sweet Projects showing the locations of the membrane is presented in Figure 4, Appendix 1.

6.7.2 A datasheet for the gas and vapour membrane, photographs and the installation records are presented in Appendix 6.

6.8 Materials Management and Waste

6.8.1 A Waste Management Plan (WMP) and a Materials Management Plan (MMP) were put in place as part of the wider development:

- Paragon, 2020. Waste Management Plan. Reference: 20.1054/CB/KJH. Dated: 9 November 2020.
- Paragon, 2021. Materials Management Plan. Reference: 201054/CB/RMc. Dated: 9 June 2021.

6.8.2 In addition, Sweet Projects, Gallagher and Toureen maintain a record of soil movement onsite. Further information is presented in Appendix 7.

6.8.3	The WMP and MMP are live documents for the entire development and the waste movement records will continue to be monitored until the end of the development.
6.9	Water Supply Pipes
6.9.1	Based on the contaminants identified during the site investigation, all materials in contact with water intended for human consumption were to comply with the Water Supply (Water Quality) Regulations 2016. As such a pipe system was to be installed to ensure the long-term safety and quality of water supply.
6.9.2	The pipework installed was PE80 SDR11 63mm MDPE barrier water pipe. Records of the order and installation are presented in Appendix 8.
6.10	Decommissioning of Boreholes
6.10.1	Sweet Projects decommissioned the boreholes as part of the site wide groundworks. The boreholes drilled along the eastern part of the site were removed prior to installation of the road. Confirmation from Sweet Projects is presented in Appendix 8.
6.11	Piling Works Risk Assessment
6.11.1	A Piling Works Risk Assessment was required as part of the planning submission. The document was submitted to the Local Authority as part of the planning application.
6.11.2	The PWRA covers UP1, EC1 and the substation. The Visitor Reception 1 is on pad foundations and as such, the PWRA is not applicable.
6.11.3	The results of the PWRA confirmed that there is a low environmental risk associated with piling. No environmental incidents were reported by Sweet Projects.
6.11.4	A decision notice is available on the planning portal (Ref: 75111/APP/2022/3428) that states that the requirements for Condition 27 (Piling Method Statement) have been met.
6.11.5	Concrete Classification
6.11.6	Aggressive ground conditions of a DS2 ACEC AC-2 classification were determined for the site across both the Made Ground, Lynch Hill Gravels and London Clay. The HDR structural specification (HDR, 105 Structural Specification – Concrete Works. Dated 14 January 2022. Ref: PUR15469 Revision 2) provided, confirms the appropriate use of concrete resistant to chemical attack.

7.0 CONCLUSION

7.1	Conclusions
7.1.1	Based on the foregoing, it is considered that the development of UP1, EC1 and Visitor Reception 1 has been completed in accordance with the Remediation Strategy. As such, the planning conditions relating to the verification report of UP1, EC1 and Visitor Reception 1 can be discharged.
7.2	Outstanding Actions
7.1.2	The clean cover system will be laid in the near future. As such, Colliers will revisit the site to confirm the thickness of the capping layer and collect samples for analysis and produce appropriate validation reporting. No further actions are considered necessary for UP1, EC1 and Visitor Reception 1.

Scalebar 100mm at scale 1:1

During Demolition and Construction:
 Control of Asbestos
 Material Management / Waste Management
 Health and Safety Controls
 Personal Protective Equipment (PPE)

Building Design:
 Barrier Pipework and clean service corridors
 Gas Membrane (Methane, Carbon Dioxide and Vapour)
 Buried Concrete within Made Ground and Lynch Hill Gravel: DS-2 and AC-2
 Buried Concrete within London Clay: DS2 AC1s
 Piling Works Risk Assessment (PWRA)

KEY:

SOFT LANDSCAPING
 150mm TOPSOIL
 450mm SUBSOIL
 (600mm CLEAN CAPPING)

SOLCO GAS MEMBRANE TO ALL BUILDINGS SITE WIDE

Potential hotspot of hydrocarbon contamination in BH08.

Capping Layer
 Soft Landscaped Areas to have a capping layer of at least 600mm thickness to mitigate risks to site users.

Site clearance and preparation including provision of documentation for the removal of the above ground tank.

Building Design:
 Barrier Pipework and clean service corridors
 Gas Membrane (Methane, Carbon Dioxide and Vapour) in Enclosed Areas
 Buried Concrete within Made Ground and Lynch Hill Gravel: DS-2 and AC-2
 Buried Concrete within London Clay: DS2 AC1s
 Piling Works Risk Assessment (PWRA)

Controlled Waters:
 The DQRA determined that there are no remediation requirements but long term monitoring will be completed to check the quality of the river.

Subject: Re: Project Union - Redundant Generator at Vodafone

This message originated outside Concert - please treat links with caution!

Mark,

The generator was a salvage item for us, which we were hoping to reuse. On this basis, we decommissioned it, disconnecting the electrical supply and the gas oil feed. The pipework was disconnected and capped off to enable this to be safe for transport.

The diesel tank was also decommissioned and any pipework capped off before its transport away from site, again for future reuse.

I hope this clears this up for you.

Kind regards

Scott Lardner MIDE

[Topsoil testing result - Project Union, TCL1182 - Phase 1.pdf](#)

Thomas,

Toureen intend to import topsoil that has been tested and passed against the top soil requirements set out by Sweet Projects. This top soil will be tested every 100m3 by the supplier and additional testing will be completed by TCL once delivered to ensure the product still meets the requirements.

Regards,

Ryan Bower | Assistant Project Manager | Toureen Contractors

Test Methods

SOP	Title	Parameters included	Method summary
2010	pH Value of Soils	pH	pH Meter
2020	Electrical Conductivity	Electrical conductivity (EC) of aqueous extract or calcium sulphate solution for topsoil	Measurement of the electrical resistance of a 2:1 water/soil extract.
2030	Moisture and Stone Content of Soils(Requirement of MCERTS)	Moisture content	Determination of moisture content of soil as a percentage of its as received mass obtained at <37°C.
2040	Soil Description(Requirement of MCERTS)	Soil description	As received soil is described based upon BS5930
2115	Total Nitrogen in Soils	Nitrogen	Determination by elemental analyser
2120	Water Soluble Boron, Sulphate, Magnesium & Chromium	Boron; Sulphate; Magnesium; Chromium	Aqueous extraction / ICP-OES
2192	Asbestos	Asbestos	Polarised light microscopy / Gravimetry
2260	Carbonate	Carbonate	Titration
2300	Cyanides & Thiocyanate in Soils	Free (or easy liberatable) Cyanide; total Cyanide; complex Cyanide; Thiocyanate	Alkaline extraction followed by colorimetric determination using Automated Flow Injection Analyser.
2400	Cations	Cations	ICP-MS
2420	Phosphate	Phosphate	Spectrophotometry - Discrete analyser
2450	Acid Soluble Metals in Soils	Metals, including: Arsenic; Barium; Beryllium; Cadmium; Chromium; Cobalt; Copper; Lead; Manganese; Mercury; Molybdenum; Nickel; Selenium; Vanadium; Zinc	Acid digestion followed by determination of metals in extract by ICP-MS.
2455	Acid Soluble Metals in Soils	Metals, including: Arsenic; Barium; Beryllium; Cadmium; Chromium; Cobalt; Copper; Lead; Manganese; Mercury; Molybdenum; Nickel; Selenium; Vanadium; Zinc	Acid digestion followed by determination of metals in extract by ICP-MS.
2490	Hexavalent Chromium in Soils	Chromium [VI]	Soil extracts are prepared by extracting dried and ground soil samples into boiling water. Chromium [VI] is determined by 'AquaKem 600' Discrete Analyser using 1,5-diphenylcarbazide.
2620	LOI 440	LOI 440 Trommel Fines	Determination of the proportion by mass that is lost from a soil by ignition at 440°C.
2690	EPH A/A Split	Aliphatics: >C10-C12, >C12-C16, >C16-C21, >C21- C35, >C35- C40 Aromatics: >C10-C12, >C12-C16, >C16- C21, >C21- C35, >C35- C40	Acetone/Heptane extraction / GCxGC FID detection
2700	Speciated Polynuclear Aromatic Hydrocarbons (PAH) in Soil by GC-FID	Acenaphthene; Acenaphthylene; Anthracene; Benzo[a]Anthracene; Benzo[a]Pyrene; Benzo[b]Fluoranthene; Benzo[ghi]Perylene; Benzo[k]Fluoranthene; Chrysene; Dibenz[ah]Anthracene; Fluoranthene; Fluorene; Indeno[123cd]Pyrene; Naphthalene; Phenanthrene; Pyrene	Dichloromethane extraction / GC-FID (GC-FID detection is non-selective and can be subject to interference from co-eluting compounds)
2760	Volatile Organic Compounds (VOCs) in Soils by Headspace GC-MS	Volatile organic compounds, including BTEX and halogenated Aliphatic/Aromatics.(cf. USEPA Method 8260)*please refer to UKAS schedule	Automated headspace gas chromatographic (GC) analysis of a soil sample, as received, with mass spectrometric (MS) detection of volatile organic compounds.
2780	VPH A/A Split	Aliphatics: >C5-C6, >C6-C7,>C7-C8,>C8-C10 Aromatics: >C5-C7,>C7-C8,>C8-C10	Water extraction / Headspace GCxGC FID detection
2920	Phenols in Soils by HPLC	Phenolic compounds including Resorcinol, Phenol, Methylphenols, Dimethylphenols, 1-Naphthol and TrimethylphenolsNote: chlorophenols are excluded.	60:40 methanol/water mixture extraction, followed by HPLC determination using electrochemical detection.

Report Information

Key

U	UKAS accredited
M	MCERTS and UKAS accredited
N	Unaccredited
S	This analysis has been subcontracted to a UKAS accredited laboratory that is accredited for this analysis
SN	This analysis has been subcontracted to a UKAS accredited laboratory that is not accredited for this analysis
T	This analysis has been subcontracted to an unaccredited laboratory
I/S	Insufficient Sample
U/S	Unsuitable Sample
N/E	not evaluated
<	"less than"
>	"greater than"
SOP	Standard operating procedure
LOD	Limit of detection

Comments or interpretations are beyond the scope of UKAS accreditation

The results relate only to the items tested

Uncertainty of measurement for the determinands tested are available upon request

None of the results in this report have been recovery corrected

All results are expressed on a dry weight basis

The following tests were analysed on samples as received and the results subsequently corrected to a dry weight basis TPH, BTEX, VOCs, SVOCs, PCBs, Phenols

For all other tests the samples were dried at < 37°C prior to analysis

All Asbestos testing is performed at the indicated laboratory

Issue numbers are sequential starting with 1 all subsequent reports are incremented by 1

Sample Deviation Codes

A - Date of sampling not supplied

B - Sample age exceeds stability time (sampling to extraction)

C - Sample not received in appropriate containers

D - Broken Container

E - Insufficient Sample (Applies to LOI in Trommel Fines Only)

Sample Retention and Disposal

All soil samples will be retained for a period of 30 days from the date of receipt

All water samples will be retained for 14 days from the date of receipt

Charges may apply to extended sample storage

If you require extended retention of samples, please email your requirements to:

customerservices@chemtest.com

APPENDIX 6: GAS MITIGATION MEASURES

Independent Inspection & Validation Certificate of Conformance

Project Ref: G201001.021UP1	Date: 19th January 2023
Name / Location: Union Park, North Hyde Gardens, Hayes, UB3 4DG	
Customer: Toureen Contractors, HA3 5QY	

Area / Installation Inspected: UP1 – Ground Slab G/Ref: 1.10to1.14/1.Pto1.Q
--

Inspection & Validation detail

Installation of Solco Solshield Ultra GR S & Solco GR SAM & Solco LGB.

Installation was inspected via Site Inspection additionally,
The installation was managed by Toureen to confirm as per design.

Repairs carried out whilst on site.

Therefore, based on the installation & evidence of repair CPL can offer sign off on this installation.
Photographic evidence included in final sign off report.

CPL do hereby confirm that the elements of the project detailed above have been inspected & validated by a suitably qualified independent consultant in accordance with industry requirements, with the test result noted below:

CONCLUSION: Pass (In accordance with design)

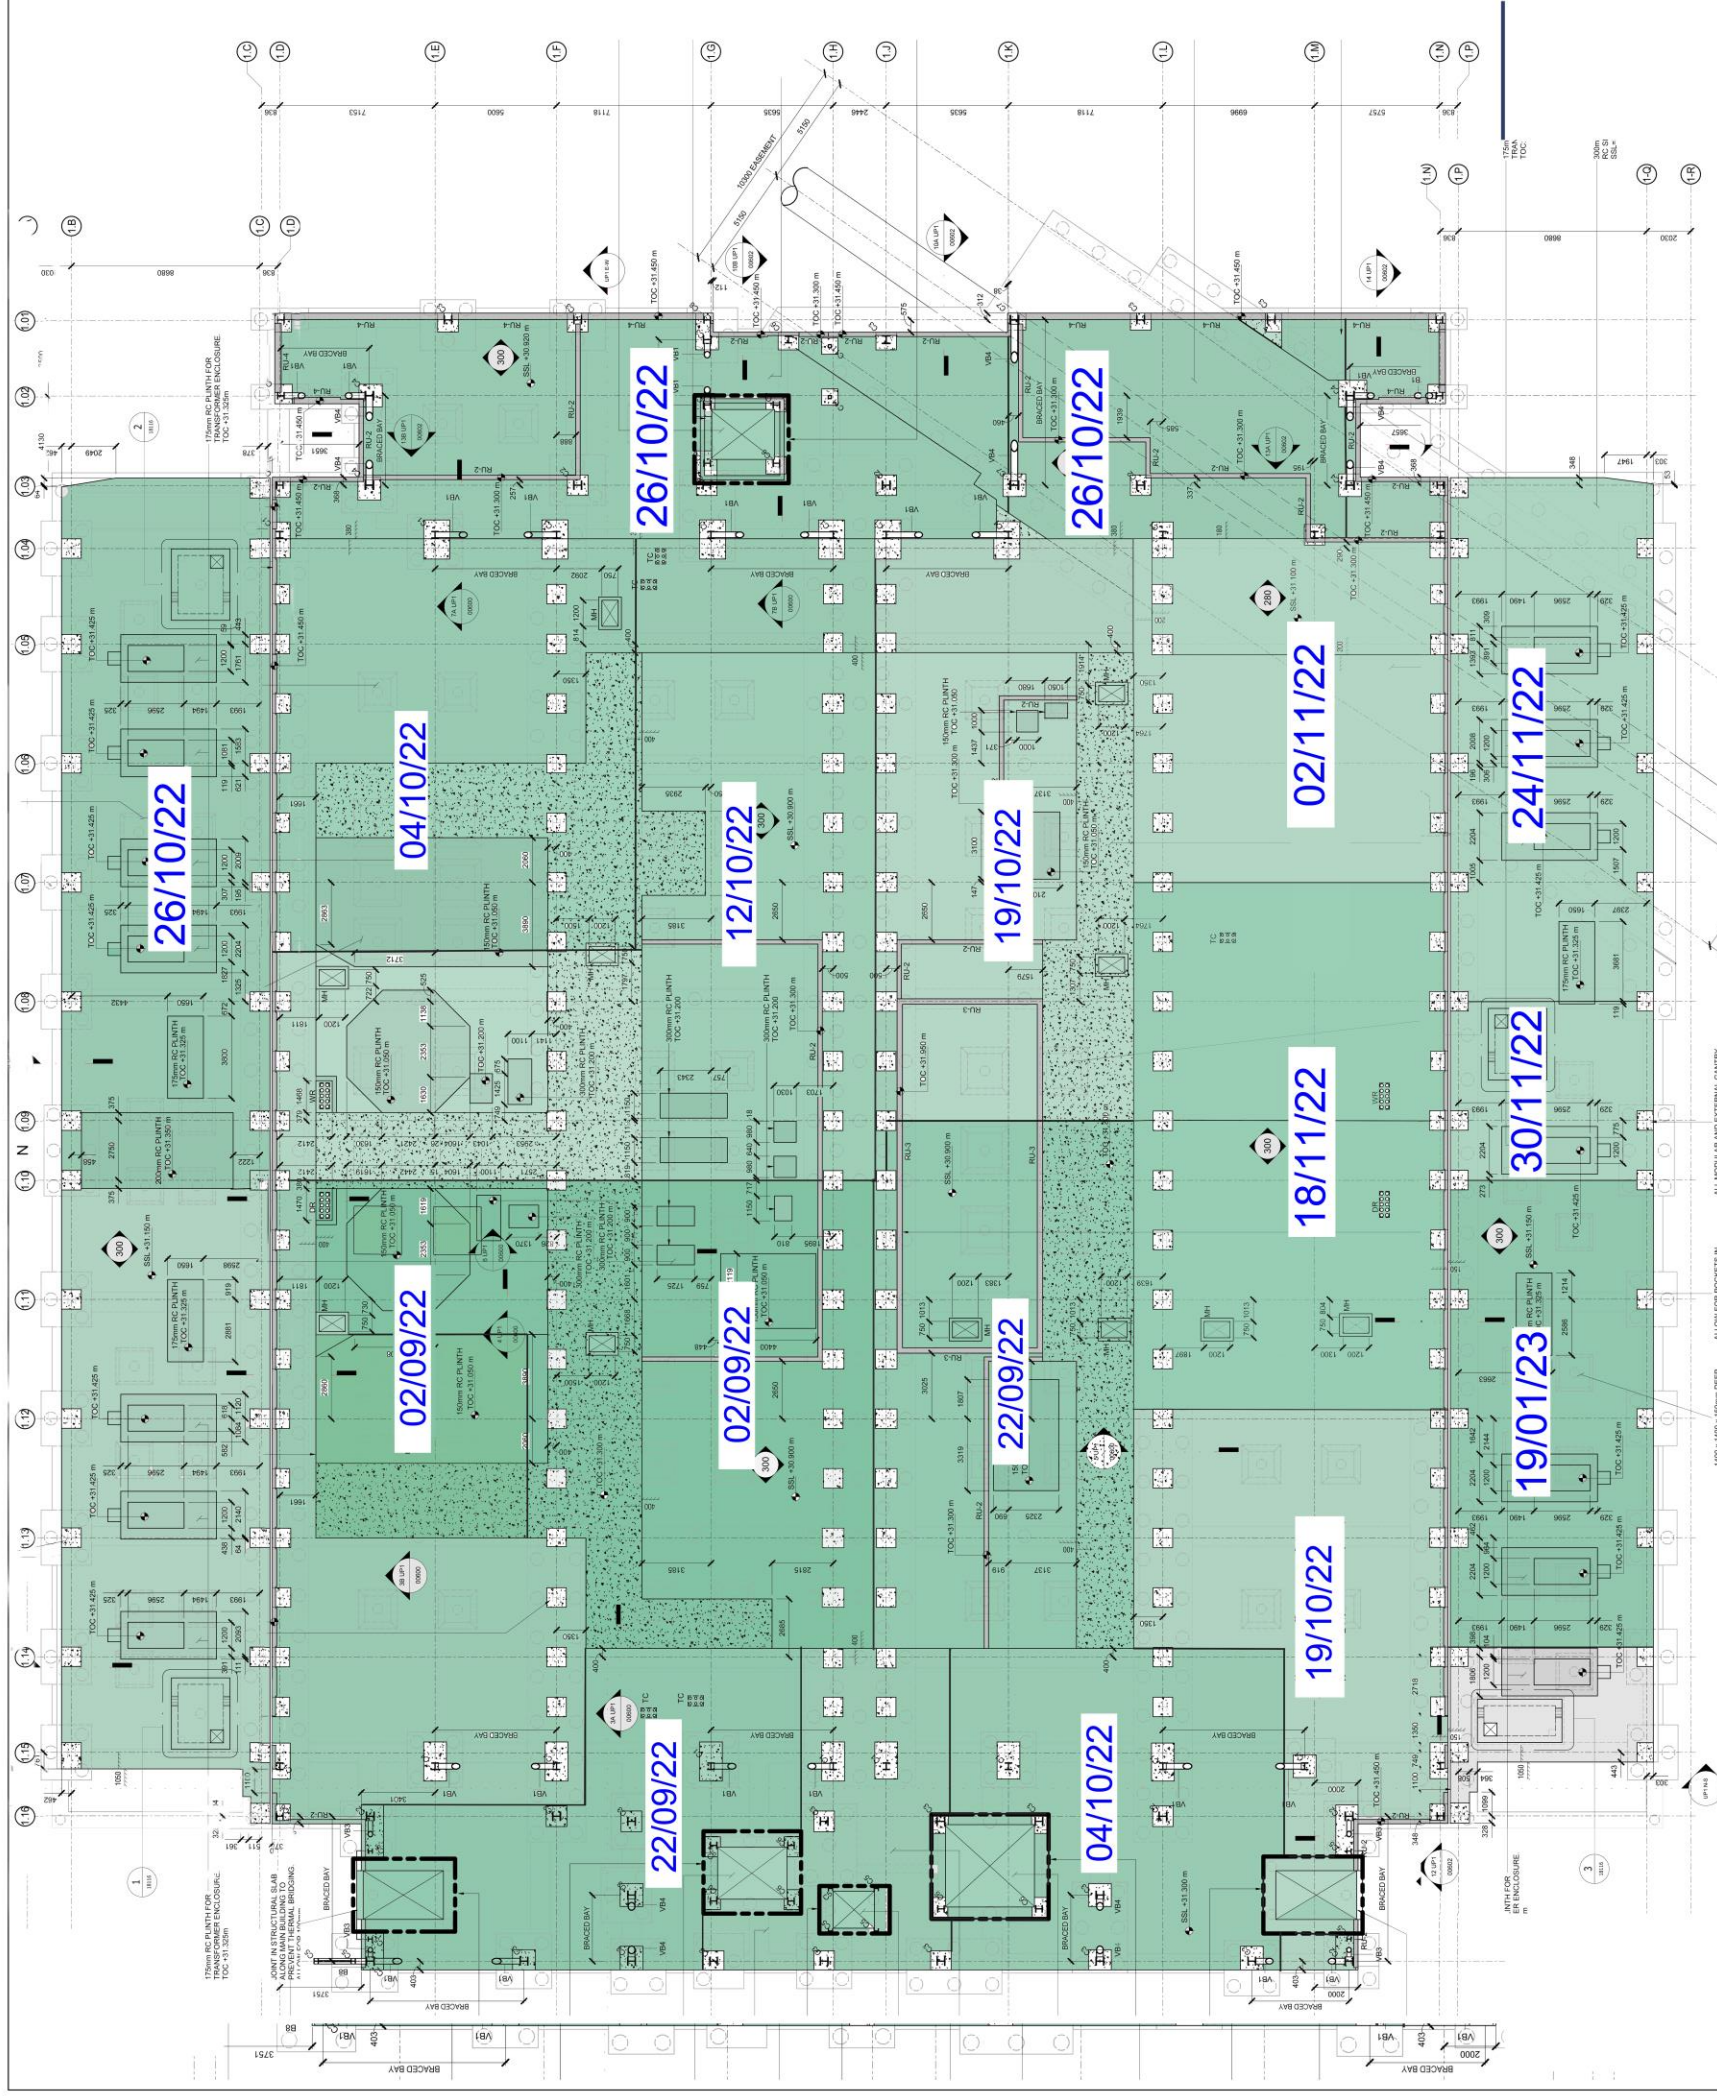

Where the conclusion above indicates as a Pass, the construction activities may proceed subject to suitable protection measures of the membrane being applied in accordance with the manufacturer's recommendations. For Fail see further comments/actions attached:

Solsheet GR Self-Adhesive Membrane

Description:

Solsheet GR Self-Adhesive Membrane is a 1.5mm thick preformed, cold applied, waterproofing system, compatible with concrete, smooth brickwork, and blockwork or screeded substrates and is resistant to those chemicals likely to be present in normal service conditions.

Solsheet GR Self-Adhesive Membrane is manufactured from an aluminium and cross-oriented HDPE film laminated to a layer of rubber modified bitumen adhesive. The advanced backing film suppresses Methane, Carbon Dioxide, and Radon gases. The membrane also offers good conformability for site application.

Solsheet Gas Resistant Self-Adhesive Membrane conforms to the requirements of BS:8485 and BS:8102. Substrates should be primed with Solseal HP Primer prior to application. Solsheet Gas Resistant Self-Adhesive Membrane can be used with Solcourse GR DPC and other Solshield Gas Membranes

After installation, the membrane should be covered as soon as possible with a cementitious screed or similar protective layer.

- **Roll Dimensions: 1m x 20m (20m²/roll).**
- **Roll Weight: 34kg.**

Features:

- Resistant to Rn, CH₄, CO₂, and Hydrocarbon Vapours.
- Cross-laminated film – provides dimensional stability, high tear strength, puncture, and impact resistance.
- Polymer modified bitumen coating.
- Cold applied – no heating via flames or hot bitumen on site.
- Flexible – will accommodate minor settlement and shrinkage.
- Comprehensive range of accessories and ancillary products.
- Full design and on-site technical support.
- Specification compliant with BS 8102:2009, BS8485:2015+A1:2019, and EN ISO 15105-1.
- CE Marked.
- Non-hazardous and resistant to dilute acids and alkalis.
- Compliant with NHBC Standards.
- Easy Application.
- Provides high-performance protection against the surface and groundwater and soluble salts such as chlorides, sulfates, alkalis, and acids.

Typical Uses:

For general waterproofing where gas protection is required:

- Internal and external tanking of underground structures.
- Land-fill sites and specific geographical locations.
- Car parks and retaining walls.
- Subways and lift shafts.

Substrate Compatibility:

- Wood.
- Brick.
- Concrete.
- Metal.
- Other construction materials.

Reaction to Fire	EN 13501-1	Pass
Ignitability	BS EN ISO 11952-2	Pass
Fire Rating	EN 13501-1	E/EFL
Storage Temperature Range		+5°C to 35°C
Application Temperature Range		+5°C to +35°C
Service Temperature Range		-20°C to +80°C
Gas Transmission Rate	ISO 15105-1	CH ₄ (single layer and joint): <10 ml/m ² /day CO ₂ (single layer and joint): <10 ml/m ² /day

Storage:

- The membrane rolls must be stacked on end and stored in dry, well-ventilated buildings, out of direct sunlight, or other major sources of heat.
- Storage conditions should be adjusted before application to bring the temperature of the rolls to within the relevant specified application range.
- The stock should be rotated on a first in/first out basis.
- Solsheet GR Self Adhesive Membrane is classified as non-hazardous (code of practice CP102 1973). The product is chemically inert and any acids or alkalis present in the subsoil will not affect the membrane.
- It is not recommended for use when exposed to sunlight and general outdoor weather conditions for long periods of time. Weathering will not occur when installed.
- Rolls should be stored undercover.
- Quality control during the laying of the membrane is extremely important.
- The membrane should be protected either through the use of temporary boarding over its whole area or the immediate laying of the concrete slab.

Installation:

Surface Preparation:

- All surfaces should be smooth, clean, and dry. Loosely adhering material and sharp protrusions should be removed by mechanical means.
- Concrete or renders should be allowed to dry before applying Solsheet membranes.

Priming:

All vertical surfaces should be primed using Solseal HP Emulsion/Primer. Horizontal surfaces do not require priming where the membrane is covered with a screed, floor slab, etc. Priming should be carried out as follows:

1. Roll can well before use.
2. Apply at the rate of approximately 2m²/L. Only prime the area which is to be covered with Solsheet within the next 4 hours. Allow to dry for at least 1 hour until touch dry. Keep free from dust.
3. On very porous surfaces, use two coats of primer.

Application:

- Internal angles must always be provided with an adequate sand/cement fillet.
- After priming as previously described a 300mm wide reinforcing strip of Solsheet must be applied with 150mm on either side of the centre of the fillet.
- External angles or corners must be provided with a 25mm x 25mm splay and this covered with a 300mm wide strip of Solsheet, applied equidistant from the centre of the splay.

Horizontal Membrane:

- This should preferably be laid prior to the application of the vertical membrane, adequately protected from damage by a minimum 25mm screed or protection board, with the membrane bonded to the vertical surface at least 200mm above the top of the screed so that the vertical Solsheet can be overlaid.
- If it is not possible to apply the screed over the membrane before the application of the vertical membrane, full and adequate protection must be given to the horizontal membrane to prevent damage.

Vertical Membrane:

- Cut off the appropriate length of membrane, then starting at the top of the area to be waterproofed, peel off at least 200mm of release sheet and bond the Solsheet firmly to the surface, tucking the end of the material into the appropriate DPC or chase.
- Gradually peel off the remainder of the release sheet downwards, at the same time rolling the material against the surface until the bottom of the wall is reached. At the base, the vertical membrane must
- overlap the horizontal membrane by at least 100mm.
- All subsequent sheets must overlap the preceding sheet by 50mm at the edges and by 100mm at ends. Overlaps must be thoroughly rolled to ensure adequate bonding.

Backfilling:

On vertical applications where an abrasive backfill is to be used the Solsheet membrane should be protected by a concrete outer skin, brick skin or Solco HD Protection Board, the latter being held in place by Solco 50mm Butyl tape.

Precautions:

- Solsheet and Solseal HP Primer must not be applied when the surface temperature of the substrate falls below 5°C.
- When a brick-skin is applied to the face of the vertical Solsheet, care must be taken not to damage the membrane and a gap of 40mm should be left, which is filled with sand/cement mortar as work proceeds.
- Only sufficient Solsheet should be laid which can be protected as work proceeds.
- When areas of Solsheet are left exposed for any length of time ensure that all edges are held in place by battens.

Solsheet GRSAM System Accessories

Solseal HP Primer	A quick drying primer that promotes the adhesion of self-adhesive membranes. Used prior to the application of Solsheet Membranes.	Tubs
Solco HD Protection Board	A tough, reinforced flexible board, used to protect waterproofing membranes against damage by abrasive backfill materials and poured concrete.	Sheets
Solco Protection Fleece	Protects Solco membranes against mechanical or chemical damage. Can be used as a separating layer between membranes and overlying components.	Rolls
Solco XL Jointing Tape	A self-adhesive tape used for securing waterproofing membranes at overlaps edge and corner details.	Rolls
Solco Foil Tape	A single-sided tape for securing laps & joints.	Rolls
Solco Double Sided Butyl Tape	A double-sided synthetic butyl mastic tape, used for bonding waterproofing membranes. Also used for bonding SA membranes to DPCs and fixing other accessories.	Rolls
Solco Top Hats	Form an effective seal where a pipe, duct, or service penetrates Solsheet membranes.	Units

Thomas,

During phase 1 of Project Union Toureen exported 27,073m³ of Non-hazardous material & imported 13,905m³ of clean material.

Regards,

Ryan Bower | Assistant Project Manager | Toureen Contractors

APPENDIX 8: POTABLE WATER SUPPLY

From: [Ryan Bower](#)
To: [Thomas Mealey](#)
Subject: Potable water pipe - Project Union - Phase 1
Date: 08 November 2023 17:27:58
Attachments: [image001.png](#)
[image002.jpg](#)
[image003.png](#)
[image004.png](#)

Thomas,

Toureen installed PE80 SDR11 63mm MDPE barrier water pipe for the potable water supply in phase 1.

Regards,

Ryan Bower | Assistant Project Manager | Toureen Contractors

T | M 07741385286

Fitting Arrangement for 125mm Supply + InLine By Pass & 90mm Supply

Fitting Arrangement for 63mm Bulk Supply

NOTES
OFF SITE WORKS
 Lay 47m of 225mm Barrier Pipe Main.
 Abandon approx 45m of 200mm Ductile Iron Main
 Abandon approx 20m of 3/4" Main/ Supply

SERVICES
 Install 11m of 63mm Barrier Pipe Service Connection with 50mm Meter for Energy Centre.
 Install 20m of 90mm Barrier Pipe Service Connection with 80mm Meter for Residential & Fire Supply.
 Install 35m of 125mm Barrier Pipe Service connection with 100mm Meter for Data Centre.
 Disconnection of Existing service supplies(1x125mm & 1x25mm)

NB
 AW Main Route Taken from Developers Survey

- All stop cocks located in roads or vehicle cross overs should be suitable for the expected vehicular loading.
- Communication pipes in carriageway to be ducted.
- Ducts for service pipes to be supplied and laid by developer at a depth of 750mm and should project 300mm beyond kerb line.
- Water mains are not laid in ducts.
- All hazard symbols are an approximate location and should be verified prior to works commencing.

BARRIER PIPE REQUIRED

MEDIUM AND HIGH RISK PROJECT REGISTER

Risk Ref Symbol	Hazard	Controls
	Waterway in close proximity	Consent req'd from Authority Body prior to start of construction. Discharge of water must comply with Authority Body & Morrison US H & S Policy
	Electricity Sub-Station	Verification of utility drawings by site investigation prior to works.

APPROVED AND CALIBRATED CABLE AVOIDANCE TOOLS MUST BE USED AT ALL PROPOSED EXCAVATIONS!
SAFE DIG METHODS MUST BE EMPLOYED AT ALL TIMES!

Subject: PU - 81 Planning Condition 38 & Slot-in 34 Decommission Boreholes
Date: 10 November 2023 16:22:47
Attachments: [jms06079907.png](#)

This message originated outside Concert - please treat links with caution!

Hi Charles,

I can confirm that in response to Planning Condition 38 of the original consent and Condition 34 of the Slot-in Consent regarding the decommissioning of bore holes, we ensure that there are currently no boreholes retained within the boundaries of the development. The open boreholes used for long term water monitoring were backfilled prior to commencement of the structural works in that area by our ground works contractor.

Kind Regards

Alex Lopez

Civils/Substructure Project Manager

M: 07917663190

Sweet Project Holdings Limited is a company registered in England and Wales under number 12459287.

Registered office: 30, Old Bailey, London, EC4M 7AU

Sweet Projects Holdings Limited accepts no liability for the content of this email, or for the consequences of any actions taken on the basis of the information provided, unless that information is subsequently confirmed in writing. Any views or opinions presented in this email are solely those of the author and do not necessarily represent those of the company.

APPENDIX 10: EXTENT OF SURVEY AND LIMITATIONS

Extent of Survey and Limitations

Section 1 shall apply to all our appointments. The relevant sections 2 to 8 will only apply where the terms of our appointment state we are providing the corresponding service. For example, where we are appointed to provide a pre-acquisition survey, sections 1 and 2 below will apply to that appointment.

1. Standard Limitations

Inspection and Concealed Parts: Our report will cover all parts of the site made available to us during our visual inspection of the property, which is normally and safely accessible without the use of ladders, and therefore exclude all ceiling, wall and floor voids unless stated within the report. Where inspection of roof areas by use of access hoists or a drone is required this will be agreed with you prior to inspection. The structure and fabric will not be opened up for further investigation. Those parts of the building and engineering services that are concealed, inaccessible or covered will not be inspected and confirmation that such parts are free from defects cannot be provided. Where we feel further investigation is merited, reference will be made in our report. Our services survey is based on a visual inspection and comment on the condition and the quality of the installation relating to normal good standards. We will specifically exclude tests relating to the performance of any heating, air conditioning or ventilation systems, pipe pressure tests, electrical or drainage tests. The omission of such tests might give risks to the fact that certain problems could exist which are not reflected in our report. No inspection or comment is made on the below ground drainage installations or service conduits unless instructed otherwise.

Occupied Buildings: Where buildings are occupied at the time of our inspection access to some areas may be restricted or denied although these areas will be noted in our report. Regardless of occupation, we will not lift fitted carpets, nor disturb any part of the fabric or fittings which are fixed or may cause damage.

Budget Costs: Where budget costs are included in our report, these costs are for guidance purposes only and will not be calculated from measured quantities but will be based on knowledge and experience of similar repair or replacement situations. Costs are inclusive of contractor's preliminaries but exclusive of all contingencies, professional fees and VAT. They will be based on current prices and no allowances will be made for inflation. Access costs for high level works will be included. There will be no allowances for loss or damage as a result of force majeure, terrorism, discovery or removal of any deleterious materials or out of hours working. Estimates are not to be thought of as a substitute for obtaining competitive quotations from reputable contractors. We will not investigate whether the cost of carrying out all necessary works immediately will be

different in cost to carrying them out individually, as and when required.

Specialist Sub-Consultants / Sub-Contractors: Where specialist consultants or contractors are engaged on your behalf. We may make reference to their findings in our report, but this should not be considered as a substitute for reading their report in its entirety, nor can we take responsibility for their conclusion.

Compliance with Legislation: In respect of planning permissions and building regulations consents we will review relevant documentation made available to us and liaise with your lawyers in this regard. If documentation is missing we will record this as a risk in our report, as should your lawyer. Our inspection will involve a review of the state of compliance with Statutory Requirements such as Workplace Regulations, Fire Regulations, Equality Act and other relevant matters. We will provide general comments on these matters in our report. Please note that compliance with these Regulations often requires a more detailed specialist study and / or the preparation of a risk assessment. Such studies and risk assessments are beyond the scope of our report. Where appropriate we will make recommendations for further specialist surveys.

Weather conditions: Our inspection may be restricted by the prevailing weather conditions at the time of our inspection.

Communicable Disease – we shall not be liable in respect of any Claim, circumstance, loss or Defence Cost that arise as a result of, or is connected in any way, directly or indirectly with;

- a) A *Communicable Disease* or the fear or threat (whether actual or perceived) of a *Communicable Disease* regardless of any other cause or event contributing concurrently or in any other sequence thereto;
- b) any action taken to control, prevent, isolate, quarantine, suppress, mitigate or in any way relating to any actual or suspected outbreak of any *Communicable Disease* or the fear or threat (whether actual or perceived) of a *Communicable Disease*;
- c) instructions, orders, requests, restrictions or limitations given by any national or local government, regulatory or statutory body, health authority or organisation relating to any *Communicable Disease*.

A *Communicable Disease* means any disease which can be transmitted by means of any substance, medium or agent from any organism to another organism where:

- i. the substance, medium or agent includes, but is not limited to, a virus, bacterium, parasite or other organism or any variation thereof, whether deemed living or not, and
- ii. the method of transmission, whether direct or indirect, includes but is not limited to, airborne transmission, bodily fluid transmission, transmission from or to any surface or object, solid, liquid or gas or between organisms, and
- iii. the disease, substance or agent can cause or threaten damage to human health or human welfare or can cause or threaten damage to, deterioration of, loss of value of, marketability of or loss of use of property.

Reliance and disclosure: The issued findings or reports following our inspection are for the addressee's use only and no liability will be accepted to any third party. Neither the whole or any part of the report may be published or disclosed to a third party without our prior written approval.

Deleterious and Hazardous Materials

Generally: Our report and survey excludes any investigation into the unsuitable use of deleterious or hazardous materials except in so far as such matters may come to our knowledge in the normal course of inspecting the property and state of repair. We will advise you if we consider there is a significant possibility that deleterious or hazardous materials exist at the property, although we will not undertake or commission specific inspections, laboratory testing or reports unless this possibility has been raised by us as a concern and further instructions received which in any event will be confined to the following: admixtures / aggregates in concrete, asbestos, brick slips, calcium silicate brickwork, high alumina cement, lead, urea formaldehyde foam, woodwool cement slab (used as permanent shuttering), aluminium composite panels, thin stone panels.

Many factors including location, use, design and quantity determine whether a material is deleterious or not and, therefore, the inclusion in the material in the above list does not, of itself, imply that it is deleterious.

As a result of the Grenfell tower fire in 2017, external cladding systems including the materials used in them remain under intense scrutiny. There continues to be wide-ranging discussions in the Construction Industry over the use of combustible cladding materials, particularly (but not limited to) to buildings in excess of 18m in height or over 6 storeys. In our report, we will report on the suspected use of any combustible materials where this can be ascertained from a review of as-built information, or if it is suspected from our inspection. However, it may not be possible to ascertain purely from a visual inspection the presence or not

of combustible materials and we cannot be held liable for not identifying their presence in such circumstances.

Where composite cladding panels may be identified in our report we confirm that no intrusive testing will be undertaken to determine the type of insulation, classification of the insulating core or whether this is approved by the Loss Prevention Certification Board (LPCB) unless instructed otherwise.

Concrete: Where instructed to undertake a concrete investigation, our specialist report will be based on a visual examination of the concrete structure in sample test locations only. Whilst such test locations are chosen to be representative of the structure as a whole, we are not able to confirm that the structure is free from structural defects other than deleterious effect of HAC, chlorides and reinforcement corrosion durability.

Asbestos: Where instructed to undertake a specialist asbestos survey, we cannot guarantee that all asbestos containing materials will be identified, despite the best endeavours of our asbestos sub-consultant. Where instructed, every effort will be made to remove representative samples however it is possible that indiscriminate uses of asbestos may be present between sample locations of otherwise visually similar materials. An asbestos management survey is non-destructive and includes an inspection within accessible ceiling voids, above loose laid removable tiles, inside openable risers and cupboards, within accessible risers and behind removable casings.

Similarly access within lift shafts, live electrical equipment and mechanical plant may be restricted. A Refurbishment and Demolition asbestos survey is destructive and includes an inspection within accessible ceiling voids, above loose laid removable tiles, inside openable risers and cupboards, within accessible risers and behind removable casings. Representative areas of each element of building fabric will be intrusively opened up to inspect for the presence of ACM's behind built-in ducts, voids or similar enclosed or concealed areas within the building fabric. No intrusive work will be undertaken within the structural framework, concrete floors and masonry walls.

Environmental issues: Save where we are commissioned to provide environmental services (in which case the relevant section of this document shall apply), the following applies. We will not carry out nor commission formal enquiries or tests relating to potential soil or ground contamination, or the ground bearing conditions of the site or neighbouring land. We will not carry out any searches with statutory bodies to establish any mining or landfill issues, and associated potential subsidence risk as a result of historic site operations. Whilst we will comment on any potential contamination issues apparent from our survey, our report will not constitute an environmental report. You are advised to procure your own environmental reporting, but we will be happy to arrange audits, reports or tests on your behalf, by specialist consultants, who are to be directly appointed by you, if required. You should ensure that your

solicitors obtain as much information as possible about the prior use of the land. Such information should be revealed to us as soon as possible as it may materially affect our/ or the consultant's advice to you. Such advice may include recommendations for testing or obtaining a warranty.

We have no liability in relation to the presence of low frequency electronic fields, radiation, toxic mould, and the presence of Japanese Knotweed or other invasive plant species as defined in the Wildlife and Countryside Act 1981 or the Environmental Protection Act 1990. We may however note their apparent presence for investigation by others as appropriate.

Mechanical and Electrical Surveys

Generally: Our survey and report is compiled under the brief to visually inspect and comment on the condition and the quality of the installation relating to normal good standards in the building services industry as dictated by CIBSE and IEE's current recommendations and standards without testing or dismantling of the plant. Where appropriate, we have provided an overview of the lift installations, which was carried out by the attending building services consultant.

Budget Costs: Any costs indicated within this report are based on our best assessment of the situation and the work involved at current prices and should not be taken as firm costs for the items of work detailed. To provide more accurate costs an investigation will be required in greater detail for individual items of the plant and systems, and may involve the employment of specialists where appropriate.

This overview provides a description of the lift services and general condition other than inspection of the lift shafts and associated equipment.

There are occasions when the building services will be inspected by a building surveyor rather than a mechanical and electrical consultant and we will advise within the fee quotation. In this case, if you require a survey by a mechanical and electrical consultant, you should confirm this prior to our inspection.

Concealed Parts: We have not inspected parts of the Engineering Services which are encased, covered up, or otherwise made inaccessible in a normal course of construction, alteration, or fitting out. We will not carry out any internal inspection of the plant/systems.

Design Analysis: No definitive calculations have been undertaken to determine the capacity or performance of the plant items, nor have performance tests been carried out on any of the systems or plant items. Design analysis of the systems has been undertaken using generally accepted design criteria both past and present, primarily to establish the principles of design. We have specifically excluded tests relating to the performance or efficiency of any heating, air conditioning, or ventilation systems, pipe pressure tests,

electrical or drainage tests. The omission of such tests might give rise to the fact that certain problems could exist which are not reflected in this report. We would point out that during the course of our building services survey we did not carry out an inspection of the below ground services.

Deleterious & Hazardous Materials: Our report and survey excludes any investigation into structural engineering design, compliance with legislation relating to buildings, or the unsuitable use of high alumina cement or calcium chloride, calcium silicate brickwork, alkali-silicate reaction in concrete, cavity wall tie failure, radon gas seepage, woodwool slab permanent shuttering, asbestos or PCB's or other materials considered as deleterious in construction, except insofar as such matters may come to knowledge in the normal course of inspecting the materials and state of repair.

White Goods & Data: This report does not include an inspection of the white goods, catering and vending equipment, telecommunication, data or wireless systems installed within the property. We are unable to comment, advise or identify items that are reliant on day/date dependent embedded chips.

Rights of Way / Support / Light

Where necessary we will comment on apparent rights of way / support or light which may be visible or suspected albeit our comments will be outline in nature and without any detailed investigations.

2. Pre Acquisition Survey

Compliance with Legislation: Our inspection will involve a general review of the state of compliance with Statutory Requirements such as the Building Regulations, Workplace Regulations, Fire Regulations, Equality Act and other relevant matters applicable within the relevant country. Please note that compliance with these Regulations often requires a more detailed specialist study and/ or the preparation of a risk assessment. Such studies and risk assessments are beyond the scope of our report.

3. Environmental

Desk Based Risk Assessment: The risk assessment is dictated by the finite data on which it is based and is relevant only for the purpose of which the report is commissioned. If additional information or data becomes available which may affect the opinions expressed in our report, we reserve the right to review such information and, if warranted, to modify the risk assessment accordingly. We reserve the right to charge an additional fee for un-anticipated second opinion reviewing of previous reports.

The survey excludes intrusive opening up of the building fabric. Accordingly, an inspection is not undertaken behind built-in ducts, voids or similar enclosed or concealed areas within the structure and fabric.

Compliance with Legislation: The environmental risk assessment will be undertaken with due regard to Contaminated Land Guidance documents (available and relevant at the time of issuing our report) issued by (but not limited to) the Environmental Protection Act Part IIA 1990, Department for Environment, Food and Rural Affairs (DEFRA) and its predecessors, the Environment Agency (and its devolved equivalents), British Standards Institute (BSI), the Royal Institution of Chartered Surveyors (RICS) and the American Society for Testing and Materials (ASTM) Standard E 1527-00. No liability can be accepted for the effects of any future changes to such guidelines and legislation. In the event that guidance / legislation changes it may be necessary for us to update or modify reports.

Content of Report: Our Phase I Environmental Audit will be based on a visual inspection of the site, a review of available historical and environmental setting records, consultations with site representatives, pertinent information provided from the client and regulatory consultations. No samples will be taken as part of this study.

Generic Risk Assessment: The risk assessment is dictated by the finite data on which it is based and is relevant only for the purpose of which the report is commissioned. If additional information or data becomes available which may affect the opinions expressed in our report, we reserve the right to review such information and, if warranted, to modify the risk assessment accordingly. We reserve the right to charge an additional fee for un-anticipated second opinion reviewing of previous reports.

The survey excludes intrusive opening up of the building fabric. Accordingly, an inspection is not undertaken behind built-in ducts, voids or similar enclosed or concealed areas within the structure and fabric. Where necessary we will comment on apparent rights of way / support or light which may be visible or suspected albeit our comments will be outline in nature and without any detailed investigations.

Phase 2 Site Investigation

Content of report: The content and findings of the report will be based on data obtained by employing site assessment methods and techniques, considered appropriate to the site as far as can be interpreted from desk based materials and a visual walkover of the site. Such techniques and methods are subject to limitations and constraints set out in the report. The findings and opinions are relevant at the time of writing, and should not be relied upon at a substantially later date as site conditions can change. For example, seasonal groundwater levels, natural degradation of contaminants etc. No liability is accepted for areas not covered by the investigation.

Risk Assessment: The opinions and findings conveyed via the report will be based on information obtained from a variety of sources as detailed by the report. The information should not be treated as exhaustive but is, in good faith, considered as representative as possible of the site conditions when considering constraints set out by the

report. The risk assessment will be completed in line with current industry practices but is not a guarantee that the site is free of hazardous conditions. The risk assessment is completed in line with the relevant land use agreed for the site and the time of completing the works. Changes to site conditions or land use may require a reassessment.

Unforeseen Contamination: Where Colliers is responsible for directing the number and location of exploratory holes, it shall exercise all the reasonable skill, care and diligence to be expected of a properly qualified and competent member of the Consultant's profession experienced in performing such services, taking into account site conditions, and available knowledge, as well as access, budgetary and scheduling constraints. Subject to having complied with the foregoing: (1) no liability can be accepted for the conditions that have not been revealed by the exploratory hole locations, or those which occur between each location and (2) whilst every effort will be made to interpolate the conditions between exploratory locations, such information is only indicative and liability cannot be accepted for its accuracy. By their nature, it is generally the case that exploratory holes provide a relatively small and localised snapshot of the ground conditions relative to the size of the site.

Buried Services: Whilst reasonable efforts will be taken to avoid buried services, we accept no liability for damage to services which have not been accurately identified in advance of site works.

Flooding: Our commentary is only based on the publicly available mapping available via the EA, NRW or SEPA at the time of writing and we cannot accept any liability where the information is updated following the issue of our report.

4. Dilapidations

Generally: We will assume unless otherwise requested that we are engaged as an advisor to prepare or comment on a schedule or claim which is distinct from an instruction to act as an expert witness. However, in discharging the advisory role it is always necessary for us to take account of considerations relating to expert witnesses as set out in the current Practice Statement and Guidance Note for Surveyors Acting as Expert Witnesses by the Royal Institute of Chartered Surveyors, a copy of which can be provided on request. This states that the primary function, and duty, of an expert witness is to assist the court on matters within their expertise.

Ongoing Advice: Our dilapidations advice aims to provide you with an informed opinion as to the anticipated level of liability/claim. Changes in case law, statute and the passage of time may affect the accuracy of our advice; it is therefore important that our advice is reviewed at regular intervals and, in particular, prior to the expiry of the lease.

Documentation Provided: Our assessments can only be as accurate as the information provided to us; it is therefore

important that the most complete set of documentation possible is provided in order for the best advice to be given. We cannot take any responsibility for distorted findings resulting from deficient, incorrect or incomplete information.

Estimated Settlement: When an estimate of settlement is provided at any time prior to concluding the claim, this is for guidance only and should never be taken as a definitive evaluation of the likely damages which may fall due.

Final Settlement: Settlements can be limited by S.18(1) of the Landlord & Tenant Act 1927 and the common law principles to the diminution in the value of the Landlord's reversion, regardless of the cost of works and other heads of claim. We will advise you if we consider that a formal valuation (commonly known as a Section 18 valuation) is necessary.

A claim based on the cost of the works may also be capped or even extinguished if it can be shown that the premises are to be altered or demolished after the expiry of the lease. Landlords should advise us if this is the case. Again, we will advise you if we consider that a Section 18 valuation is necessary. Where no formal release is provided by a Landlord we reserve the right to charge on a time expended basis.

Solicitors: In some cases it may be necessary to liaise with a solicitor on matters of strict legal interpretation. In the event of litigation, our communications with surveyors and other experts, including solicitors, may not be privileged.

Your legal advisors need to advise you on compliance with break notices as we only look at dilapidation liabilities under a lease and there may be other liabilities which impact on the break such as vacant possession, payment of rent, etc. Your legal advisors will be responsible for service of any schedules / notices. If you do not use a lawyer then we cannot accept any liability for incorrect service of schedules / notices.

Your legal advisors will be responsible for agreeing the wording of any forms of release used to record agreement on a financial settlement. If you do not use a lawyer then we cannot accept any liability for incorrect wording in helping to conclude matters between parties.

Heads of Claim

Loss of Rent, Rates, Service Charge, etc.: For the purposes of the calculation of a loss of rent (and where applicable, service charge) claim we will provide an assessment of the period that it is likely to take to procure and complete works identified in the Schedule of Dilapidations. However, the applicability of such a claim will depend on market conditions prevailing at the end of the term and require initial input from your appointed letting agents shortly before lease expiry. Unless specifically agreed or stated within the lease, we will not include finance charges, loss of rates and other similar items in our assessments/claims.

Fees: We will include an allowance for legal fees only for the service of Schedules of Dilapidations in our assessments and claims. Surveyors' fees for the preparation and service of schedules will be included but other professionals' fees (such as building services or structural engineers) will not be included unless otherwise stated. All professional fees included will be estimates.

VAT: VAT may form part of a claim and is subject to the VAT status of the property and parties to the lease. The total claim (of which VAT may form part) is a damages payment that Customs and Excise do not deem a taxable supply. Invoices are not usually issued by landlords to tenants for this reason.

Contamination: We will include in our assessment any obvious contamination issues but we will not undertake any tests or investigation of current or previous uses of the site or adjoining land. We will advise you where we consider a need for specialist advice.

5. Energy Performance Certificates

Generally: This work is usually undertaken in three stages being:

1. Site inspection and research;
2. Data inputting and Calculating the Certificate; and
3. Lodging the certificate and reporting to the client.

We will initially determine the level of complexity of the building from the information provided by the client. Should it be determined during the site inspection that the complexity of the building and/or its services makes the standard assessment methodology inappropriate, this will be drawn to the attention of the client and a revised proposal will be submitted for sub-consulting the assessment to enable Dynamic Simulation Modelling (DSM) to be carried out.

Fees: Our fee quote is based on the assumption that the building can be inspected in one visit with unrestricted access to all areas. If we find that access is restricted to some parts of the building and that a return visit is required we will invoice all additional time on a time charge basis.

Where keys are held remotely from the property we will charge an additional fee on a time charge basis to cover our time in collecting and returning the keys. Where an instruction is made on the basis that plans are available the following applies:

- Plans must be to scale.
- Plans must accurately show the current layout of the premises.
- Plans must be provided at the time of appointment or before inspection.

Where plans are not immediately available and we are expected to recover them from other parties an additional charge may be made to cover our time in this regard.

Site Inspection: The nature of a building's construction will not always be obvious from a visual inspection alone. Where sectional details are not available we will use the inference values provided in iSBEM. Where these are poor and possibly have an effect on the banding/rating of the property we may advise the client to consider opening up elements of the property so that more accurate construction details can be obtained. Opening up works will fall outside the initial fee agreement and we reserve the right to invoice our time for this separately.

Lifespan/Carbon Checker: We will generate the EPCs using Lifespan. This system is a software application tool that provides an interface to enable the user to enter data into DCLG's SBEM (Simplified Building Energy Model). SBEM is at the heart of all government approved interface tools and whilst it has been passed for use, and Lifespan is an accredited software tool, there are inherent built in faults with the software that may affect the final rating. Although some tests have been undertaken to establish the accuracy of this software. We accept no responsibility for the software's accuracy.

Reporting and Advice: The EPC generates a Recommendations Report within which advice is given for the building owner to upgrade the building's efficiency performance. The advice is generic and in some cases is not considered to be relevant. Where we consider the advice to be poor, we will tailor the report to more accurately reflect the requirements of the building. The recommendations given in the report are not mandatory, so where a building owner implements improvement works based on the recommendations we would expect them to discuss the proposals in more detail before any expense is incurred.

Documentation Provided: We cannot take responsibility for the accuracy of any information provided by others for the purpose of carrying out the assessments. Similarly we cannot take responsibility where information to be provided is missing or its provision is delayed and that information conflicts with our assessment. Where such documents become available we recommend that copies are forwarded to us immediately in order that any advice provided can be refined.

6. Bank or Fund Monitoring

Our report is based upon discussions with the borrower (being the person to whom our client, a funder, is lending money), as well as reports, records and data provided by the borrower or on their behalf ("Information"). We will use our professional judgement and experience to evaluate and interrogate the Information, however we are not auditing the Information and we cannot guarantee that it is accurate and complete in all respects. It is the borrower's duty to ensure that the Information is accurate and complete, and

we shall not be liable for any errors or omissions in the Information, or for losses arising as a result of such errors or omissions.

7. Rights of Light and Daylight

Where necessary we will comment on apparent rights of way / support or light which may be visible or suspected albeit our comments will be outline in nature and without any detailed investigations.

Generally

This work is usually undertaken in three stages being:

1. Site inspection and research;
2. Modelling and testing; and
3. Reporting and provision of advice.

Analyses are often reliant on third party advice and particularly in relation to initial RoL and DSO studies based on a number of assumptions relating to the surrounding buildings. The RoL work also involves legal and valuation matters on which we may offer opinions but should be verified by reference to appropriate specialist consultants.

Site Inspection

Whilst we will endeavour to undertake a thorough review of the buildings surrounding the site, where certain parts are not readily visible from vantage points available to us, we cannot guarantee that all relevant receptors will be included. Assumptions may be made as to the presence and position of windows situated on elevations of existing buildings, which cannot be readily seen. To prevent alarm and respect privacy of neighbouring occupiers, close inspection of windows in neighbouring buildings may not be possible and this may affect the quality and accuracy of information taken on site. Assumptions will be made as to room size, use and layout where necessary. No topographical survey of site levels or elevation detailing will be undertaken. Should precise dimensions and window locations be required, we would recommend that separate topographical land, building and elevation surveys are instructed and provided in AutoCAD format.

Research

Limited research will be undertaken where necessary to determine:

1. Age of buildings;
2. Historic site development;
3. Legal constraints; and
4. Planning policies.

Where necessary to assist research, historic maps, aerial photographs and Land Registry title documents may be purchased and charged as disbursements.

Modelling & Testing

3D Modelling is usually undertaken using AutoCAD software. Unless provided with accurate topographical survey information relating to levels and elevation detailing, approximate dimensions will be used from limited measurements taken on site, available OS data and 'brick counting' from photographs. Where necessary we may buy third party photogrammetry models as a starting point for creating our models. The cost of same will be

charged as a disbursement. Tests are usually undertaken using software licensed to us by Waterslade/MBS Survey Software. Although some tests have been undertaken to establish the accuracy of this software we take no responsibility for the software's accuracy.

Reporting and Advice

Reports and advice will usually be based on a number of assumptions and with reliance on third party information. Where assumptions have been made, these will usually be stated and recommendations will be given for further work required. Where specialist legal, planning and/or valuation advice is required, recommendations for same will be highlighted within our report or separately.

Third Party Advice and Products

Our processes include the use of third party advice and products such as:

1. Ordinance Survey data;
2. Title documents;
3. Baseline models;
4. Topographic surveys;
5. Aerial photography;
6. Architects' drawings; and
7. Local authority archive information.

Whilst we will review this information for accuracy insofar as required for our assessments, we do not accept any liability for inaccuracies in third party information or loss or damage arising from some.

Valuation of Damages

Where appropriate we will provide book value damages estimates for right to light infringements.

Valuations Will Be

- Based on assumed rents and yields;
- Formulated in accordance with standard industry practice;
- Given at current prices; no adjustments will be made for future inflation;
- Quoted as budget estimates only and are not to be thought of as a substitute for obtaining specialist valuation advice;
- Exclusive of both parties' professional fees;
- Exclusive of any taxes that may be applicable i.e. VAT/SDLT.

We Will Not

- Provide valuations based on development gain or profit share method.

8. Party Wall Terms – Building Owner and Adjoining Owner

Surveyors Appointment

References to 'Appointing Owner' and 'Building Owner' are references to you. References to 'Adjoining Owner' relate to the owner/s of the neighbouring property adjacent to your work that is or may be subject to the Act.

To administer the requirements of the Act surveyors need a

written appointment. The appointment must be an individual and cannot be a company. Liability for work undertaken remains solely with us and not the appointed individual under the Act. We will provide a draft letter of appointment which must be completed and returned to confirm the appointment at or before the point at which there is either a deemed or actual dispute.

The letter of appointment must be signed by the Appointing Owner, or an agent with specific authorisation to sign on your behalf.

Once the appointment is confirmed it cannot be retracted or determined except if the surveyor appointed declares themselves incapable of acting in certain circumstances as prescribed by the Act. You should be aware that appointments follow a statutory procedure which requires the appointed surveyor(s) to work within the jurisdiction of the Act by administering its provisions fairly and impartially.

Fees

You are contractually responsible for payment of your surveyor's fee and those of the Adjoining Owner where we advise it is reasonable to do so.

An Award will generally determine that the Building Owner is responsible to pay the fee of both appointed surveyors. However, specific circumstances may mean this is not always the case. For example, fees may be apportioned between Owners if they both benefit from the works.

We reserve the right to charge additional fees in relation to changes in the design or scope of the works that requires addendum Award(s) or new Notice(s).

We reserve the right to charge additional fees in relation to assessing claims for damage and awarding any necessary compensation or making good.

Fees – Specialist Consultants

In some circumstances appointed Surveyors may suggest that specialists such as engineers or solicitors are appointed to assist in matters directly related to the administration of the Act or determination of the dispute.

The contract and responsibility for fees in relation to this appointment will be between the specialist and you. You are also likely to be responsible for the reasonable fees of the Adjoining Owner's Specialist Consultants' fees.

Boundary Determination

Whether a wall is built up to, or astride the boundary is not always easy to determine. Sometimes this can only be established by reviewing title deeds and with the assistance of a solicitor. Our advice without the benefit of title information is very much outline and will be based on certain assumptions.

Timescales

Whilst we will liaise with the design team and contractor to procure information required for Notices and Awards, it is outside our control if information from the design team and/or contractor is either incorrect in terms of design or

level of detail, or is not provided to us in good time.

Information for the Award

The design team and appointed contractor are responsible to provide the information requested to be included within the Award. Where possible we will give an indication of the likely information that will be required. We are not responsible for any delay to action requests for information that may impact the development programme.

Right of Access

In certain circumstances the Act allows the Building Owner to access the Adjoining Owner's land for the purpose of executing work in pursuance of the Act. Our fee does not include for discussing access to works that are not in pursuance of the Act and if that is required, a separate agreement and fee will be given.

Security for Expenses

We will not hold monies for Security for Expenses. It is usual practice that any sum agreed will be held in a solicitor's client account sometimes managed as an escrow account and only released on signature of two of the three surveyors.

Where relevant, the terms and conditions in relation to Security for Expenses will be set out in the Award.

Third Surveyor Referrals

The appointed surveyors are required to appoint a Third Surveyor to determine any disputed matters. If referral of a disputed matter to the third surveyor is necessary, the procedure will be set out to you, along with any cost implications.

We may charge an additional fee for time relating to matters incidental to third surveyor referrals.

General

We will make all reasonable efforts to identify the Adjoining Owner(s) of a property by making checks with the Land Registry (with the cost charged as a disbursement). We cannot accept any liability it after making reasonable enquiries, we do not manage to ascertain all Adjoining Owners with an interest in the property.

The ability to agree an Award is very much linked to the quality and level of detail that is provided from the design team and/or contractor. We cannot accept responsibility if the Information provided is insufficient to enable completion of an Award.

We do not accept any liability arising from the loss or delay in delivery of Notices by the Royal Mail or other carriers.

Where the depth of foundations is unknown and in the absence of any information such as trial pit Information, we will make a reasonable estimate on the foundation depth.

Our schedules of condition in relation to the Act only extend to the area of the property in close proximity to the notifiable work and will not unless considered necessary, extend to a full record of the condition of the entire Adjoining Owner's property.
