Hi Emma,

Please find attached the revised form as requested.

With regards Q9a, there is not an 'inlet' as the effluent discharged in the cooling towers is a 'by-product' of the carbon capture process. Therefore, to complete Q9a, we have utilised the same grid reference as the effluent sampling point.

We trust that the attached is acceptable to you, and the application will be able to Duly Made.

Regards,

James

Hi James,

Thanks for providing the additional information.

The option for Q1 on the B6 form has been selected incorrectly, the trade/and or non-sewage effluent discharge is a chargeable activity code. The correct type of effluent is 'Effluent and/or contaminated surface water run-off arising from the operation of an installation' and carries a slightly different set of questions. There is no additional charge for this activity. This is a very common error with this application form and we are working to improve the layout of the form so it's clearer.

I believe that the additional questions that we require responses to, not already answered are:  
Q7 F and G  
Q9 A

Please could you resubmit the form with the correct option selected and the additional answers,

Many thanks,  
Emma

Dear Emma,

Further to your recent request, please find attached a technical note containing the additional information requested, plus supporting Appendices.

We trust that the attached is acceptable to you, and the application will now be Duly Made.

Please advise if you have any questions.

Regards,

James

Hi Aleks,

Thank you for your time earlier. As discussed, I have now been able to review your application for the purpose of duly making. This was to determine that sufficient information was submitted to enable me to perform a technical assessment.

During my checks I have identified both application forms and documents that need to be revised or submitted. Please see the attached letter for more details and information required.

If you have any questions please don't hesitate to get in touch,

Many thanks,  
Emma
