Overview of Site

The applicant has recently rented the site for 20 years from the site owner / landlord.

The site has 2 existing poultry houses, which have previously been used for housing 22,000 laying hens. It is now intended (with a third building under development) that the site will be capable of housing 40,000 hen pullets and 3,000 cockerels.

Materials from Raw Materials List

Biocide and Pesticide Containers

These containers are flushed after the contents have been used. This is undertaken at the Ox House site in a facility dedicated to all of the agricultural sprays from the farm. The clean containers are then crushed into bales and sent for recycling.

Veterinary Medicines

The packaging from these is taken and disposed of by the vaccinators.

Shaving Bales

The plastic packaging from these is returned to the Ox House site and baled for recycling as per above.

Fuels

There are no waste products associated with the delivery of these products.

Other

There is a small amount of domestic waste generated but the site manager in the welfare facilities. These are disposed of via the local municipal waste / recycling system.
