

Tank Farm bund wall height of over 675mm covering an area of 627.5m². This equates to a bund storage of 423,562.50 litres of oil which is 29.7% of the maximum possible storage volume (42 tanks each with a maximum capacity of 34,000 litres). This is greater than the required 25% storage capacity within the Oil Storage Regulations guidance.

Operating site perimeter bund wall height of over 65mm covering an area of 1,667m². This equates to a bund storage of 108,355 litres of oil which is 51.3% of the maximum possible storage volume (Palletised storage and machine "in flight" combined maximum volumes equalling 211,168 litres). This is greater than the required 25% storage capacity within the Oil Storage Regulations guidance
