

**Not Duly Made Question 6:**  
**Annual Tonnage of Powder Coating Used Onsite**

Anochrome Limited can confirm the following annual usage of powder coating materials since 2022:

<b>Calander Year</b>	<b>Annual Volumes (Kg)</b>
2022	910
2023	1820
2024	1700

The powder coater is only used infrequently and was bought to accommodate the requirements of a small number of customers. Given extant demand, it is unlikely that greater than 20 tonnes of powder coating material will be used annually in the foreseeable future.
