

The Contractor is to check and verify all building and site dimensions, levels and sewer invert levels at connection points prior to the commencement of works.
 This drawing must be read with and checked against any structural or other specialist drawings provided by the client.
 The Contractor is to comply in all respects with the current Building Regulations and CDM regulations whether or not specifically stated on these drawings.
 This drawing is not intended to show details of foundations, ground conditions or ground contaminants. Each area of ground relied upon to support the proposed works, including drainage, depicted must be investigated by the contractor, suitable methods of foundation be provided and any suspect contaminants on or within the ground covered by the works be further investigated by a suitable expert.
