Hi Andrew,

I have put together the other requested information.

The gilt site diagram I have drawn on the drainage, location of the midden and the dead bins for collection.

The finisher site is the plans for both buildings which gives the majority of the information required – I have attached a second version of this and have circled red the two units with the permit showing the roads coming to both of them for emergency services access.

The dust management plan is also attached.

And to confirm the name of the unit will be Scampston Pig Unit.

Any questions please let me know 😊

Thanks

Kind Regards,
Ellie Stephenson
