

Appendix 12: Housing and Drainage Review

The proposed installation (see Appendix 4) is in line with BAT guidance in terms of design and management. Routine maintenance schedules (please see Appendix 3) will maintain these standards and we will regularly review any areas which could be improved in future.

1. Is manure and dirty water managed to the standards in How to Comply?

Manure is exported directly, with no storage required on site. A dirty water/wash water capture tank is being installed for the existing buildings to bring the site into line with BAT. The proposed new build will also have a capture tank.

The gradients and curbing of outside areas will be reviewed to ensure protection of clean water drainage systems.

2. Is ventilation managed to the standards in How to Comply?

Ventilation is managed to BAT - no further action required

3. Is temperature managed to the standards in How to Comply?

Temperature is managed to BAT - no further action required

4. Does the general management conform to the standards in How to Comply?

Buildings and the wider installation are managed to BAT - no further action required
