Hi Simon

I can confirm the ridge will be shut - I am just waiting to get someone drawings that I can show you to confirm!

Kate

Thanks for this

As per discussion the immediate issue is ensuring HV fans alone not open ridge extraction as well

You have benefited from an improved ammonia impact , not needing modelling (£620 charge) and a review of modelling by our team (extends application time)

We need HV fan compliance without ridges as an immediate final duly making response.

If not able to be confirmed by Friday 23rd August we will have to return your application for you to review your preferred approach.

The issue of odour is an issue and preventing air going in one side of curtains and out through out causing an odour concern re receptor < 100 m away in wind direction is a post duly making issue – not for now

Thanks in advance
Simon.

Ok Kate

For absolute clarity I think we just need the ventilation to be confirmed as HV only in tech standard document and not open ventilation also

It is just that the screening relies on HV fans alone

Thanks

Simon

The first paragraph is about how the old buildings were – not the new ones. The ridge that has the fans in will also be open ridge – that is the plan as far as I'm aware but the fans will move the air.

Kate

Thanks

Just concerned about open ridge comment in tech standards what is this?

Ventilation currently classed as HV fans alone on ammonia assessment. Is this correct? If so please delete open ridge in tech standards and NTS- see deletions in NTS version attached please confirm accurate.

Otherwise all good – please can you just confirm when £620 payment made for our admin team

Thanks

Simon

PS I think we must have passed near Malton on way to Scarborough.

Kate

Good morning

Just back from break

Thanks for all your responses

I think we are making progress

One final set of updates needed, and we can duly make the application.

Final details needed are as follows:

1 Non-tech summary.

- Please confirm what is soakaway e.g. an unlined pond or grassed area etc
- Please confirm no discharge from installation to surface water
- Please confirm no generator within installation (future one would be subject of a variation)

2 Site Drainage plan

- Please remove out of use slurry tank
- Please add a key for D1 e.g. pond acting as soakaway as relevant
- Please put two blocks to represent two pig houses
- Please show a key for red dirty water – stating wash water and muck run off going tom underground slurry tank

3 Tech Standards document

- Please remove all inlet ventilation from emissions table
- Understand only outlet ventilation is HV fans not natural ventilation to support revised ammonia report -therefore remove natural ventilation.
- Please clarify what soakaway is as above e.g. unlined pond.

4 Payment

Thanks for confirming payment – to help our admin team please confirm what date payment made

Thanks in advance.

Hi Simon

Hope you've had a good time away!

Hopefully this is all that you need from me for now!!

Let me if I'm missing anything!

Thanks

Kate

Kate

Thanks for these

I need to do a full review on all docs but can give initial comments on these plans

Odour, Noise and Dust – appear fine- please confirm distances are from installation boundary by adding from boundary in distance column in all three documents

For Non-Tech Summary – please just finalise pig building ventilation I think now natural ventilation on inlet and HV roof fan extraction

Hope of use

Thanks

Simon

Hi Simon

We have a day off harvest so trying to get through these – I thought it might help you if I send a few that I have completed already!

Thanks

Kate

Kate

Good morning

Please find attached the full list of questions to allow this application to be duly made (basic info sufficient)

They are mainly technical questions with one additional fee required for a dust management plan review if there are residences within 100 m of the installation boundary

The OMP is an example to assist you.

Please submit responses by **Wednesday August 21st**

This is to ensure application can be duly made and not returned

If any questions I am in today and tomorrow , then from August 19th

Best wishes

Simon Wigglesworth
