

Reference A - Summary of Management Systems – Broachdale Hens

Normal Operations

Records are kept on many aspects of the farm operation including movements, bird mortalities, laying %, water usage, feed consumption and feed deliveries.

Maintenance Schedule & Records

All buildings are regularly inspected and checked for visual signs of structural damage and security. Maintenance is carried out regularly on feed systems. All records are kept in the office.

Incidents

All staff are trained how to deal with any incident that might occur and are instructed how to avoid the incident happening again.

Complaints

Any complaints are logged with the manager and the main office is made aware. A site identification notice will be placed at the site boundary in accordance with how to comply.

Accidents

An accident management plan is in place which can be implemented in the event of an accident occurring.

Staff & Contractors Responsibilities & Training

All staff and contractors are suitably qualified to work at the installation. All staff receive training from the manager and will be informed of the requirements of the environmental permit and pollution prevention. Staff training is recorded.

Site Security

The site does have a perimeter fence. No entry signs are in place to warn people against entering the site.
