## Reference E - Broachdale Hens Environmental Risk Assessment.

What do you do that can harm and what can be harmed  Hazard Receptor Pathway			anaging the Risk Assessing the Risk		
Receptor	Pathway	Risk Management	Probability of exposure	Consequence	Overall Risk
The closest receptor is over 661m away	Air	The ventilation system will be regularly monitored. This is temperature controlled.	Unlikely	Odour annoyance	Not significant
The closest receptor is over 661m away	Air	Carcasses to be placed in sealed containers	Unlikely	Odour annoyance	Not significant
The closest receptor is over 661m away	Air	Deliveries to be made during reasonable day time hours. Drivers to drive with consideration	Unlikely	Noise annoyance	Not significant
The closest receptor is over 661m away	Air	Deliveries to be made during reasonable day time hours.	Unlikely	Noise annoyance	Not significant
The closest receptor is over 661m away	Air	Loading and unloading is only at the start and end of each batch. Theres months between this happening.	Unlikely	Noise annoyance	Not significant
The closest receptor is over 661m away	Air	Deliveries are made in into sealed silos from sheeting trailers.	Unlikely	Dust on surrounding trees	Not significant
	Receptor  The closest receptor is over 661m away  The closest receptor is over 661m away	The closest receptor is over 661m away  The closest receptor is over 661m away	Receptor Pathway Risk Management  The closest receptor is over 661m away Pathway Risk Management  The closest receptor is over 661m away Risk Management  The closest receptor is over 661m away Pathway Risk Management  Air Receptor Receptor is over Receptor is o	Receptor Pathway Risk Management Probability of exposure  The closest receptor is over 661m away Pathway Risk Management Probability of exposure  The closest receptor is over 661m away Pathway Risk Management Probability of exposure  The closest receptor is over 661m away Pathway Pathw	Receptor Pathway Risk Management Probability of exposure  The closest receptor is over 661m away  The closest receptor is over

	Human and	Direct contact	Visitors kept to a	Unlikely	Human and livestock	Not significant
