Hello Phillip,

I called and left a message this morning.

I was just calling to let you know that I have picked up the variation application for the Gransmoor Quarry (site B), located in Harpham, East Yorkshire.

I've just started going through the application documents today so I hope to be in touch within the next few days if further information is required to validate your permit.

If you want to get in touch about this application please feel free to 'reply all' to this email or call me on the number below.

Regards

Mark Oxford
