

About this consultation

YO26 6PD, British Sugar Plc: environmental permit consultation

The aim of this consultation is to ask whether you have any comments relevant to the permit application

We want to make the best decision when permitting. Listening to the views of others helps us to take account of concerns, or local environmental factors, that we may not be otherwise aware of.

We are seeking comments on the application for British Sugar Plc. Please use the reference number below when making comments on this application.

- Permit Number: EPR/QP3593NF/V004
- Regulated facility type: A7 Industrial Waste Landfill: This substantial variation is to for the addition off a proposed Deposit for recovery activity to the closed landfill permit currently on site to allow for the creation of a platform for future residential development on the site. In addition this variation also includes the expansion of the existing Environmental Permit landfill site boundary to encompass a larger proportion of the overall site owned by British Sugar including the area which was formerly used for beet sugar processing, and to allow the use of waste from within the existing permit boundary within the new expanded site boundary. This proposed increase in permit area is to enable the waste within the current permit boundary to be re-used on site and for the new landform to be built in accordance with the required site levels as defined in the associated development planning permission.
- Regulated facility location: British Sugar plc, "Soil and Sludge Lagoons", Millfield Lane, York, YO26 6PD

Non-Technical Summary

Refer to the non-technical summary which explains this application, in non-technical language.

This should include a summary of the regulated facility, the key technical standards and control measures arising from the risk assessment.

What the response will be used for

We will take your consultation responses into consideration as part of our determination of the permit. If we decide to grant the permit we will explain how we made our decision and how we have addressed the concerns that were raised.

We will only issue a permit if we believe that harm to the environment, people and wildlife will be minimised and that the operator has the ability to meet the conditions of the permit. Providing a business can prove that the proposed activities meets all the legal requirements, including environmental, technological and health requirements, then we are legally obliged to issue a permit, even if some people do not approve of the decision.
