Hi Liz

Please see attached documents.

Regards

Steve

Dear Steve,

I'm going to be the permitting officer dealing with the above application, all my contact details are below. I've just got a few minor questions I could do with a response on please.

1. Odour, noise and bioaerosol management plans

The distance to the farmhouse needs reducing within these documents as the extension to the installation boundary is bringing the farm closer than 50m (however the farmhouse will not be considered a sensitive receptor in relation to noise and odour as it is associated with the farm operations, but as the farmhouse is currently listed in these documents it should be corrected or removed).

Although not required for duly making, I have the following further queries to ask at this stage that may help to reduce the determination time.

- a. Could you please add a review period in the noise management plan.
- b. In relation to the site layout and drainage plan, can you make sure sheds 4 and 5 are numbered.
- c. Please confirm if the drains running adjacent to the poultry houses are all french drains (shown by the blue lines on your site drainage plan)? Maybe you could make this clearer within your layout and drainage plan (key).
- d. What is the lightly contaminated water shown as brown lines in the site layout and drainage plan? I presume these will all discharge via the french drains so will receive some attenuation before discharging to the watercourse.

I look forward to receiving your response.

Thanks

Liz
