

## **EMS OP06: Contractor Environmental Risk Management**

Version No: 1	Issued By: Operations Manager
Issue Date: 20 February 2022	

---

### **INTRODUCTION**

---

This procedure describes the method by which I'Anson Bros Ltd manages the environmental risks associated with contractors that work on site.

The main objective of this procedure is to ensure the risk associated with contractors and grounds maintenance specialists, in terms of environmental damage and legislative non-compliance, is minimised.

---

### **REFERENCES**

---

Health & Safety - Contractors – held on the computer system.

---

### **RESPONSIBILITY**

---

The Operations Manager is responsible for this procedure and its communication to the Production Manager. The Production Manager is responsible for its implementation on site.

---

### **HAZARDS**

---

Contractors conduct a range of activities on site using an array of materials and produce a variety of wastes. If contractors activities are not managed on site this increases the risk of the following:

- Non-conformance with site procedures.
- Significant environmental damage.
- Non-compliance with environmental legislation.

---

### **ACTIONS**

---

Refer to the Control of Contractor Procedures.

---

### **LEGISLATION**

---

There is no specific environmental legislation associated with contractors work on site but non-compliance with some could potentially occur from contractors work on site.

Details of the legislation relating to this are contained in the Environmental Register of Legislation held on the computer system.
