

GENERAL NOTES

- All dimensions are in millimetres unless otherwise stated. All levels are in metres above Ordnance Datum (mAOD) Newlyn.

NOTES

- Proposals and details shown are preliminary and all drawings are indicative. Also the details shown could change to accommodate considerations for temporary works and access of construction vehicles.
- This drawing is to be read in conjunction with drawings ZZ.00.100, A1.03.100, A2.03.100 and A2.03.200.
- The services locations shown in this drawing are only indicative and based on information received (C2 Returns) from Service Providers in March 2015.
- The sizes of all the channels shown are only indicative and are subject to change.

LEGEND

- Existing Watercourses
- New / Modified First-Stage Channel
- New Second-Stage Channel
- New spillway
- Riffles
- Wetland Features: (Scrapes, Backwaters)
- Indicative locations of Trees to be Retained
- Indicative locations of Trees to be Felled
- Bays + berms (channel)
- Flow control structures

Statutory Undertakers Information

- Communications
- Electricity cable (High Voltage)
- Electricity cable (Low Voltage)
- Gas main
- Gas main (Low Pressure)
- Water main
- Drainage - Foul Water
- Drainage - Surface Water
- Drainage - Combined
- National Grid

SAFETY, HEALTH & ENVIRONMENTAL INFORMATION

In addition to the hazards/risks normally associated with the types of work detailed on this drawing, note the following:

CONSTRUCTION:

- Areas of work adjacent to watercourses and there is a risk of drowning. Temporary works required to isolate working area from water. Machines to be operated at furthest point from watercourses. No lone working within the vicinity of a watercourse.
- Working near public rights of way - Willow Walk. Traffic management where appropriate. Fencing, signs and compliance with regulations.
- The existing stone bridge to the West of Willow Walk is unsuitable to accommodate heavy vehicles - not to be used for construction traffic.
- Contamination of controlled waters. Existing watercourses are to be isolated prior to any concreting works.
- Unexploded ordnance. Site risk assessment to be produced and recommendations followed during investigation.
- Presence of underground and overhead cables. Utility plans to be kept on site during the works. Positions of overhead electricity services and pylons to be noted.
- Presence of livestock in areas that are outside the designated working areas.

MAINTENANCE/CLEANING:

- Working near watercourses. No lone working and adjacent access tracks could ground vehicles.

DECOMMISSIONING/DEMOLITION:

It is assumed that all works will be carried out by a competent contractor working, where appropriate, to an approved method statement.
