Tenbury Wells Flood Risk Management Scheme (FRMS) - Frequently Asked Questions (FAQs)

Why are you doing the scheme?

Tenbury Wells in Worcestershire is situated on the banks of the River Teme. A tributary, the Kyre Brook, also joins the River Teme in the town. Both the River Teme and the Kyre Brook have a long history of flooding.

After the flooding in February 2020, the Government committed an additional £4.9 million of public money to allow a flood risk management scheme (FRMS) for Tenbury Wells to be progressed.

Our aim is to start construction by March 2022.

What are the key activities in 2021?

We are now at the design stage of the project. The key upcoming activities are listed below;

- Ground investigation and site survey work started in February 2021. The survey information will help inform the design of the scheme.
- The scheme design - which will include landscape and environmental considerations and more detailed engineering options.
- Working towards the submission of a planning application for later in 2021.

Will there be more engagement with the community as the scheme progresses?

We want to work closely with the community and key stakeholders and are keen to engage with you throughout the project. We will share more detailed information about the scheme at the following key stages;

- Once design and landscaping options have been further developed.
- Prior to submission of the planning application.
- Prior to starting construction on site.

How we engage with you will be dependent on Coronavirus (COVID -19) restrictions, but we hope to host some face to face meetings in the future, if it is safe to do so. Please be assured that we will also continue to share information with you about the scheme on a

Updated in February 2021.

regular basis, through our newsletter and online information page. This is explained in the FAQ section titled 'Will we be kept informed about the scheme?'

Will my house be protected against flooding?

At this stage in the design process, we predict that the scheme, when complete, will reduce flood risk to approximately 120 residential and 145 commercial properties.

The FRMS will be designed to provide a 1 in 100 year Standard of Protection (SoP) (equivalent to a 1% chance of flooding at any given year), with an additional allowance for climate change.

Is the design finalised? Some areas don't appear to be protected.

The proposed scheme consists of embankments and flood walls through the town. It will include some improvement to existing structures and flood gates are also being considered in specific locations. The precise location and height of the bunds and walls is subject to detailed design and consultation with key stakeholders and the community. We are reviewing some specific areas of the scheme, in particular, for example at St. Marys Church, with a view to incorporating additional properties or assets if possible.

The scheme will be designed so as not to increase flood risk elsewhere.

Does the scheme consider climate change?

We always consider climate change when designing and implementing a scheme. We follow Environment Agency guidance and add allowances for climate change.

Does the scheme consider surface water issues and other types of flooding?

The scheme aims to reduce fluvial (river) flooding from the River Teme and the Kyre Brook. We will work with our partners, including Worcestershire County Council, to consider surface water and groundwater flood risk across the town.

We are aware that a number of properties suffer from groundwater ingress to basements and low levels in houses. To better understand how the groundwater behaves across the town we are installing a number of groundwater monitoring points as part of our site investigation work. We will monitor the groundwater over a period of around 6 months.

We are also aware that certain areas of the town are affected by surface water flooding. We are working closely with Severn Trent Water and Worcestershire County Council to make sure that the scheme avoids causing any detrimental surface water flooding.

Updated in February 2021.

Will there be other improvements in the town as part of the scheme?

As part of the scheme, we will be looking to upgrade some existing walls and walkways where we can. We will also be looking to provide environmental enhancement and minimise any damage to the existing environment (for example, avoiding unnecessary tree removal) wherever possible. We will be working with the local community and stakeholders to identify any other opportunities for improvements and added benefits, however we do note that the scheme has a fixed budget and must reduce flooding to the town as a priority.

I live in an area where I am not protected by the defences. Will my flood risk increase?

Tenbury's scheme will be designed so as not to increase flood risk elsewhere. This will be scrutinised in a flood risk assessment as part of the planning consent required from Malvern Hills District Council. It is really important to us that we do not move flooding from one place to another.

Will we be kept informed about the scheme?

We will keep people informed and engaged throughout the length of the scheme. We will do this through regular newsletters and our online information page, which can be accessed at the following link <https://consult.environment-agency.gov.uk/west-midlands/tenbury-wells-flood-risk-management-scheme>

If you would like to receive our newsletter, please email your contact details to Tenbury.FRMS@environment-agency.gov.uk, or call our National Customer Contact Centre on 03708 506 506 during office hours and we will add you to our mailing list.

PLEASE NOTE- By providing us with your contact details you consent to the Environment Agency using the details provided to contact you with updates about the Tenbury Wells Flood Risk Management Scheme. We will keep your contact details until the project is closed or until you withdraw your consent, whichever is sooner.

You can withdraw your consent to receive these updates at any time by emailing us at Tenbury.FRMS@environment-agency.gov.uk or calling 03708 506 506. We will not share your details with any other third party without your explicit consent, unless we are required to by law.

The Environment Agency is the data controller for the personal data you provide. For further information on how we deal with your personal data please see our Personal Information Charter on GOV.UK (search 'Environment Agency personal information charter') or contact our Data Protection team. Address: Data Protection team, Environment Agency, Horizon House, Deanery Road, Bristol, BS1 5AH. Email: dataprotection@environment-agency.gov.uk

Updated in February 2021.

Will there be disruption to me during the construction works?

As we have not finalised the design for the scheme, we cannot provide any information about disruption to individuals. However, any scheme is likely to provide some level of disruption, such as noise, road closures and construction traffic. We will keep the community informed whilst developing the scheme to ensure people are made aware of any disruptions in advance and are able to talk to us about their concerns. We always work with contractors who are 'considerate neighbours'.

How are you going to access the construction area?

We will minimise the disruption to local residents and always consider health and safety when looking at access routes, such as putting adequate traffic management systems in place. As part of our design process, we will look at access arrangements to all areas of the scheme and make sure that all individuals who are directly affected are consulted.

When working on sections of the scheme, will there be foot path closures and will there be alternative routes available?

Unfortunately footpath closures will have to take place during the works. This is mainly for health and safety purposes. We will be looking at all the affected footpaths and determining where alternative routes and diversions will be required.

Can I approach your staff directly on site to discuss the proposed scheme?

During this period of social distancing due to Coronavirus (COVID-19), to help keep everyone safe we ask that you:

- Avoid/minimise your contact with our site staff and contractors as much as possible. Please follow the 2 metre distancing guidance.
- If you have concerns or queries relating to the scheme, please do not approach our staff and contractors on site. We ask instead that you contact us via email on Tenbury.FRMS@environment-agency.gov.uk or by telephone during office hours on 03708 506 506.
