

Odour assessments from Jan 2020

Date	Time	Findings
07-01-2020	10:30 to 12:30	Before the site visit an odour assessment was completed opposite the site entrance and at the adjacent Gardners Garden Centre. No odour was detected at these locations. The weather was dry, with an intermittent breeze and mild.
14-01-2020	08:50 to 9:20	<p>The survey was carried out at and in the vicinity of the following locations:</p> <ul style="list-style-type: none"> • The lay-by on Cemetery Road adjacent to the Walleys Quarry Site entrance •Galingale View, Gadwall Croft and Barnacle Place on the new housing estate. •Silverdale •Gardeners Garden Centre <p>A very slight landfill gas type odour was detected outside the site and was tainted by a soapy sickly smell which resembled odour mask perfume.</p> <p>No landfill/ odour mask type odours were detected at the other locations or in the general vicinity of Walleys Quarry Landfill Site during the travelling.</p>
17-01-2020	10:00 to 12:00	<p>The 'location points' are listed below, together with the results obtained using a Geotech TDL-500. The 'location points' should not be considered indicative of any source of complaint.</p> <ul style="list-style-type: none"> •Walleys Quarry Landfill Site Entrance, no odours detected. 10:15 to 10:30 hrs. •Iron Bridge Drive, no odours detected. •Silverdale Road in the vicinity of the traffic lights, no odours detected. •The Racecourse, no odours detected. •Entrance to 'Hamptons old scrap yard site': transient slight landfill gas type odour detected (1 out of 6). 3.5 ppm recorded at 11:00hrs •Gadwell Croft, transient slight landfill gas type odour detected (1 out of 6). 3.2 ppm •Gadwell Croft at junction to Barnacle Place, transient slight landfill gas type odour detected (1 out of 6). 3.4 ppm. •Barnacle Place, transient slight landfill gas type odour detected (1 out of 6). 3.4 ppm •Snowgoose Way, transient slight landfill gas type odour detected (1 out of 6). 3.4 ppm •Reedmace Walk, transient slight landfill gas type odour detected (1 out of 6). 3.4 ppm •Entrance to 'Hamptons old scrap yard' return, no odours detected at 11:16 hrs. •Orme Road, junction of St Andrews Drive, transient slight landfill gas type odour detected (1 out of 6). 3.2 ppm. •Walleys Quarry Landfill Site Entrance return, no odours detected. 11:45 <p>The officers did not detect any odour at any of the 'location points' that was likely to cause annoyance, or during the travelling between points in the vicinity of Walleys Quarry Landfill Site.</p>

06-02-2020	09:15 to 11:15	<p>The survey was carried out at and in the vicinity of the following locations:</p> <ul style="list-style-type: none"> • The lay-by on Cemetery Road adjacent to the Walleys Quarry Site entrance •Galingale View, Gadwall Croft and Barnacle Place on the new housing estate. •Entrance to 'Hamptons Old Scrap Yard •The Racecourse •Silverdale Road •Pool fields Avenue •Emery Avenue <p>A very slight landfill type odour was detected along Cemetery Road it was at is most noticeable adjacent to the entrance to Maries Way. The odour was transient and is rated at 1 out of 6. No landfill type odours were detected at the other locations or in the general vicinity of Walleys Quarry Landfill Site during the travelling.</p>
25-02-2020	08:50 to 11:10	<p>The survey was carried out at and in the vicinity of the following locations:</p> <ul style="list-style-type: none"> • The lay-by on Cemetery Road adjacent to the Walleys Quarry Site entrance •Galingale View, Gadwall Croft and Barnacle Place on the new housing estate. •Silverdale Road and traffic Lights •Gardeners Garden Centre •Race Course •Mill Street •Poolfields •Orme Road •Snow Goose Way <p>A <u>very slight</u> transient landfill gas type odour was detected occasionally in the vicinity of Gadwall Croft and Barnacle Place, and on one occasion at 10:00hrs a stronger though intermittent landfill gas type odour was detected at Barnacle Place, rated this at 3 possibly 4, it was therefore a 'distinct' odour</p>
27-02-2020	13:00 to 15:30	<p>The survey was carried out at and in the vicinity of the following locations:</p> <ul style="list-style-type: none"> • The lay-by on Cemetery Road adjacent to the Walleys Quarry Site entrance •Galingale View, Gadwall Croft and Barnacle Place on the new housing estate. •Silverdale Road and traffic Lights •Gardeners Garden Centre •Race Course •Mill Street •Poolfields

		<ul style="list-style-type: none"> •Orme Road •Snow Goose Way •Westlands Avenue <p>A slight transient landfill gas type odour was detected occasionally in the wind during the odour tour. This was also accompanied at times by a waste type odour.</p> <p>Both odour types were particularly noticeable in the vicinity of Gadwall Croft and Barnacle Place. On one occasion at 15:00hrs when the wind was quite strong a stronger though still intermittent landfill gas type/ waste type odour was detected at Barnacle Place rated this at 3, it was therefore a 'distinct' odour,</p>
2-03-2020	10:00 to 14:00	<p>During the tour odours described by officers as burning of plastic and solvent / glue were detected on the footpath between Church lane and Oak Road. These odours were not considered to be associated with the landfill facility and have been past to the local authority for investigation.</p> <p>Mains gas odours were detected at two locations during the tour. Officers did not detect odours of landfill gas during the site tour indicating landfill gas was being well managed. This was supported by the monitoring results.</p> <p>Tim Low completed odour assessments on the same day, a summary of these is provided below</p> <ul style="list-style-type: none"> - Gadwell/ Barnacle, waste type odour at 09:25hrs - Westlands Avenue, vicinity of Edenhurst School, no odour at 11:11hrs - Racecourse, no odour at 12:06hrs - Malham Road, no odour, 11:30hrs. - Gadwell/ Barnacle, waste type odour, at: 12:10hrs. - Gadwell/ Barnacle, strong waste odour at: 13:10hrs. <p>Waste odours were detected at the locations detailed on the enclosed reports. Three officers determined these waste odours to be at a level likely to cause pollution (level of 3/6) outside of the landfill site on Barnacle Place, Gallingale View and Gadwell Croft. The odours were constant at these locations for over 15 minutes during the odour tour.</p>
17-03-2020	09:30 to 11:20	<p>The survey was carried out at and in the vicinity of the following locations:</p> <ul style="list-style-type: none"> •The lay-by on Cemetery Road adjacent to the Walleys Quarry site entrance •Halfway Place •Silverdale Road •Keele Road •Galingale View, Gadwall Croft and Barnacle Place on the new housing estate •Malham Road & Oak Road

		<p>A very slight landfill type odour was detected along Halfway Place Road, this was most noticeable at the junction with Silverdale Road. The odour was transient and is rated at 1 to 2 out of 6.</p> <p>No landfill type odours were detected at the other locations or in the general vicinity of Walleys Quarry Landfill Site during the travelling.</p> <p>No mud or debris was observed on roads accessing the facility and no vehicles were observed waiting to enter the landfill.</p>
26-06-2020	10:30 to 11:30	<p>Off-site odour tour undertaken prior to site inspection (between approx. 10:30 and 11:30hrs). – No odours detected.</p> <p>The survey was carried out at, and in the vicinity of, the following locations:</p> <ul style="list-style-type: none"> •The lay-by on Cemetery Road adjacent to the Walleys Quarry site entrance •Cemetery Road to Keele Road roundabout •Entrance to former Hamptons Scrap Metal Facility •Gallingale View •Gadwell Croft •Baranacle Place •Keele Road/Orme Road Junction •Orme Rd to Newcastle-under-Lyme •Silverdale Road •Halfway Place •Cherry Hill Lane •Traffic Lights at Silverdale Road/Cemetery Road junction •Mill Street •Racecourse •Park Road •Ashbourne Drive •Newcastle Street •Oak Road •Malham Road
02-07-2020	13:30 to 15:30	<p>During the odour tour we both detected intermittent landfill gas type and waste type odours in the gusting wind at the former entrance to the old Hamptons scrap yard, this was particularly noticeable at 14:20hrs which we rated at a 3 to 4 strength (distinct to strong odour). We also detected the same types of odour at Gadwall Croft particular at 14:25hrs rated at 2 odour strength (faint odour).</p>

		<p>Officer detected intermittent landfill gas type odours on Orme Road between 15:09 and 15:20hrs, rated at 1 to 2 odour strength (very faint to faint odour).</p> <p>The wind was blowing in a direction from the site towards the above locations at the times when odour was detected.</p>
07-07-2020	10:30 to 11:30	<p>No landfill type odours were detected during the tour, the weather was very wet with a light wind blowing from the South West.</p> <p>Officer did note that muddy rain water was gathering at the bottom of Silverdale traffic lights, however it was hard to determine to what extent / if any, site operations were contributing to this.</p>
09-07-2020 (2 officers)	13:30 to 15:00	<p>At 13:30hrs to 13:50hrs approximately, the officers both detected a constant waste type and landfill gas type odour outside the site entrance, at Maries Way and along Cemetery Road towards the roundabout, they rated this at an odour intensity of 3-4 (distinct to strong odour).</p> <p>At 14:15hrs to 14:37hrs approximately, the officers again picked up the same odours at the above locations rating it at 2-3 odour intensity (faint to distinct odour).</p> <p>Officers observed the road sweeper in use, although some slight highway staining from the site was still evident.</p> <p>The wind was blowing from NNE throughout the tour.</p>
14-07-2020	10:45 to 11:30	<p>Officer detected a landfill type odour of waste whilst at the entrance to the former Hamptons Scrap Yard, Galingale View, Gadwell Croft and Barnacle Place. I rated the odour at 1 to 2 and it appear to be in the air. There was a gentle wind blowing which was in the direction of NNE changing too SSE, your on-site weather station will better clarify the direction. Temperature was recorded at 14c</p>
16-07-2020	12:00 to 12:45	<p>Officer detected a landfill type odour of waste whilst at Galingale View and Gadwell Croft (the entrance to Hamptons former scrap yard was blocked by a parked Travis Perkins lorry). At 12:15hrs I rated the odour at 1 to 2 and it appear to be in the air. There was a gentle wind blowing which was in the direction of South East East. Temperature was recorded at 15c.</p> <p>When officer returned to Galingale and Gadwall at 12:45pm the same odour was still detected, officer rated it as a definite 2 odour intensity.</p>
29-7-2020	09:40 to 10:30	<p>An off-site odour tour was undertaken prior to site visit. No odour detected at locations visited</p> <p>Assessments at Gadwell Croft and Hamptons to Gallingale View were completed with the landfill manager who was already in the area completing odour assessments. It was noted there were a small number of birds (approx 20 in total) on the roofs of 8 properties. The birds were on the roofs (with one exception) of properties with accommodation in the lofts.</p>

		On arrival at the site there was no mud or debris noted on the highway outside of the site entrance.
31-07-2020	10:00 to 11:00	<p>Officer noted odour as follows:</p> <p>10:00-10:10 Garners Garden centre car park - transient landfill gas and waste odour, intensity 2. 10:18-10:22 Maries Way - transient landfill gas odour, intensity 1-2. 10:30-10:34 Mill Street - transient landfill waste odour, intensity 1. 10:54-11:00 Cemetery Road (from the layby opposite the site entrance to the cemetery entrance) – persistent landfill gas and waste odour, intensity 1-3 varying with the breeze.</p> <p>The weather was dry, sunny and hot, the temperature was between 23.5 and 25.5c. There was a light occasionally gusty breeze coming from the South East.</p>
12-08-2020	09:35 to 11:00	<p>Off-site odour tour undertaken prior to site inspection. No odours detected other than a very faint fresh waste odour detected for a short section along Cemetery Road between Maries Way and the old garage. The odour was transient and rated at 1 to 2 out of 6.</p> <p>On arrival at the site there was no mud or debris noted on the highway outside of the site entrance or along the internal haul road.</p>
19-08-2020	09:45 to 10:30	<p>An off-site odour tour was undertaken prior to site visit</p> <p>Odour described as fresh waste was detected (2/6) at 9:50am at the Lay-by on Cemetery Road adjacent to the Walleys Quarry site entrance. A similar odour was detected in the car park of the adjacent garden centre at 10:30 am</p> <p>Photos of a lorry parked within the lay-by on Cemetery road and a second on the corner of Cemetery Road (near Park Road) were sent to the site manager prior to the visit at approximately 10.15 am. The movement of vehicles on the public highway does not form part of the Environmental Permit. Operator responded quickly to the messages and the drivers were moved on.</p> <p>On arrival at the site the weather was mild with light rain, the rain increased during the visit. There was no mud or debris noted on the highway outside of the site entrance or along the internal haul road as we arrived and left the site</p>
31-08-2020	17:30 to 18:30	<p>Officer detected a sickly, gassy landfill type odour at the junction of Maries Way, at Walleys Quarry site entrance and the entrance to Gardener Garden Centre at 17:55hrs, 18:00hrs and again at 18:16hrs.</p> <p>Officer rated the odour at a constant 3, and it appeared to be in the air. There was a very light wind in the direction of North North West. Temperature was recorded at 14c.</p>

31-08-2020	21:00 to 22:00hrs	<p>Officer didn't detect any odours at the junction of Maries Way, at Walleys Quarry site entrance and the entrance to Gardener Garden Centre, during this later tour.</p> <p>However officer did detect pockets of a gassy landfill odour in the vicinity of Gadwall Croft, Barnacle Place and Greylag Gate I rated the odour at a constant 1 to 2.</p> <p>Officer also detected an odour at the junction of Acacia Avenue/ B5368, it was hard to determine the type of odour, slightly gassy, damp possibly, officer rated this odour at 1 and officer made a note of this as we often receive complaints from the Malham Road area.</p> <p>The air felt still, the weather data recorded a very light wind in the direction of North North West. Temperature was recorded at 9.5c.</p>
01-09-2020	22:45 to 23:30	<p>On my journey there at 10:48hrs officer did detect a wall of gassy odour in the vicinity of the Tesco Express on the Keele Road, at the junctions to Dene Side and Whitfield Ave, officer uncertain of the source type and rated it at 1 to 2 in nuisance strength.</p> <p>At 10:50hrs officer detected a constant sickly gas/ waste type odour at Gadwell Croft and along Barnacle Place, rated at 2 to 3, the air appeared still, temperature 11c.</p> <p>At 23:10hrs officer detected a gassy/ waste type odour at Halfway Place, rated at 2, air still, temperature 11c.</p> <p>Officer returned to Gadwell Croft and Barnacle Place at 23:15 hrs and detected the same sickly odour, rated at 2 to 3, the air appeared still, although the same odour could also now be detected on Galingale View.</p> <p>At Orme Road a very slight gassy odour was noticeable, rated at 1 to 2, still air, 11c.</p> <p>On my return journey the odour officer had detected earlier on the Keele Road near Tesco appeared to have gone.</p> <p>No odours were picked up at any other location, however officer did record a P22 Logistics trailer (no tractor unit or registration number) parked in the layby opposite the Walleys Quarry site entrance during my tour.</p> <p>The BBC weather site recorded a very slight wind in a North North West direction during my tour, although to me the air felt still.</p>
03-09-2020	21:30 to 22:30	<p>Officer detected along Barnacle Place at 21:30hrs a very slight stale landfill type odour which I rated at 1 to 2, officer returned at 21:40 and the odour had disappeared.</p> <p>At the Race Course location officer detected a slight fresh cut grass type of odour, and possibly a very slight new paint odour.</p> <p>At 22:10hrs on Halfway Place officer detected a very slight landfill waste type odour, rated this at 1 to 2, and noted that remaining stationary in my car was difficult due to traffic congestion on Halfway Place.</p>

		I recorded a temperature of 14c, and the light wind was blowing towards NNE according to the BBC Weather App.
09-09-2020	09:15 to 10:30	An off-site odour tour was undertaken prior to site visit. No odour detected at locations visited On arrival at the site the weather was warm with a light wind & some stronger short gusts. There was no mud or debris noted on the highway outside of the site entrance or along the internal haul road as we arrived and left the site.
14-09-2020	12:10 to 13:05	Officer did detect a very slight gassy landfill type odour in the vicinity of Malham Road South and Downham Road at 12:40hrs, rated this at 1 to 2 odour strength. The same odour was also detectable on Brook Way and at the junction of Church View, again very slight 1 to at most 2. There was a very light wind blowing towards the North, temperature was recorded at 22c. Officer didn't detect any landfill odours at the other locations visited, but noted that there were strong 'cooking food' smells in the vicinity of Snowgoose Way and Racecourse. Also officer did record noticeable traffic fumes at various locations during the tour.
16-09-2020	07:25 to 09:50	On arrival the weather was noted as cool, misty and still. No odours were detected other than a faint, localised waste and possible gas type odour in the vicinity of former Hamptons scrap yard. The odour was transient and rated at 1 to 2 out of 6. Upon completion of the above tour a return visit was made to the former Hamptons Scrap yard at approximately 08:30hrs to recheck the odours detected earlier. A very faint transient waste odour was detected in the vicinity of the traffic lights at the junction of Keele Road and the entrance to the former scrap yard. Again, this odour was transient and rated at 1 to 2 out of 6. Freshly cut grass noted in Howard Place. The early morning mist had started to clear at this point with the sun starting to break through. A northerly breeze was now noticeable.
17-09-2020	08:51 to 10:03.	Officer detected landfill gas initially then fresh waste at Cemetery Road (from Garners entrance up to the junction with Park Road) rated 3/6. 08:52 odour noted whilst driving in the car with the windows down. Keele Road – 1/6 – Cut grass 09:20 Odour noted at traffic lights junction with Galingale View estate Maries Way – 1-3/6 – Landfill gas and waste 09:22-09:26 Transient odour Racecourse – 1/6 – Landfill gas and waste - 09:30-09:33 Earls Street – 1/6 – Landfill gas and waste - 09:35-09:37 Abbey Street – 1/6 – Slightly gassy, predominantly waste 09:38-09:40 Transient odour Maries Way – 1-2/6 – Slightly gassy, predominantly waste, 09:47-10:03 Odour became less strong whilst I was there
08-10-2020	13:30 to 14:15	<u>Odour Tour 08-10-2020</u> Whilst in the vicinity of Walleys Quarry landfill site I visited the following area to carry out a brief odour check. Keele Road.

		<p>The entrance to the former Hamptons Scrap Yard. Galingale View. Barnacle Place. Greylag Gate. Snowgoose Way.</p> <p>The wind was strong and blowing towards the south, however I did detect a very slight landfill waste odour at Galingale View, rated 1 to 2 in odour strength. I recorded the temperature at 12.5c.</p>
19-10-2020	11:10 to 11:55	<p><u>Odour Tour 19-10-2020</u> Whilst in the vicinity of Walleys Quarry landfill site I visited the following areas to carry out a brief odour check.</p> <p>Keele Road. The entrance to the former Hamptons Scrap Yard. Galingale View. Barnacle Place. Greylag Gate. Snowgoose Way. The Race Course. Malham Road. Silverdale Road (including the traffic lights cross roads.</p> <p>The wind was strong and blowing towards the North, at 11:45hrs I detected a transient gassy landfill type odour at the Silverdale traffic lights cross roads. I rated this at a 2 to 3 in odour strength. I recorded the temperature at 12c.</p> <p>Please email me your investigation response.</p> <p>----- <u>Site Entrance/ Highway 19-10-2020.</u></p> <p>The highway adjacent to the landfill site entrance showed evidence of light road staining from vehicles leaving the site, it extended towards the Silverdale traffic lights cross roads. There was no debris observed on the highway. I did note that the road surface was very dry, and that the only waste vehicle I did see leaving the site also appeared dry.</p>
16-11-2020	10:40 to 11:50	<p>Off-site odour tour undertaken prior to site inspection (between approx. 09:25 and 10:30hrs). – No odours detected other than a faint fresh waste odour and potential landfill gas odour detected on Barnacle Place and Gadwell Croft. The odour was transient and rated at 1 to 2 out of 6.</p> <p>The survey was carried out at, and in the vicinity of, the following locations:</p>

		<ul style="list-style-type: none"> •The lay-by on Cemetery Road adjacent to the Walleys Quarry site entrance •Cemetery Road to Keele Road roundabout •Entrance to former Hamptons Scrap Metal Facility •Gallingale View •Gadwell Croft •Baranacle Place •Keele Road/Orme Road Junction •Orme Rd to Newcastle-under-Lyme •Silverdale Road •Halfway Place •Cherry Hill Lane •Traffic Lights at Silverdale Road/Cemetery Road junction •Mill Street •Racecourse •Park Road •Ashbourne Drive •Newcastle Street •Oak Road •Malham Road
03-12-2020	09:20 to 10:30	<p><u>Odour checks</u></p> <p>Prior to the visit odour assessments were completed (between approx. 09:20 and 10:30hrs).</p> <p>No odours were detected at the following locations which were visited:</p> <ul style="list-style-type: none"> •Keele Road •Poolfield Avenue •Gallingale View, Barnacle Place •Entrance to former Hamptons Scrap Metal Facility <p>Odour was detected at the following locations: Cemetery road between the site entrance and Maries Way (2/6 - landfill gas)</p>

26-12-2020	13:15 to 14:30	I attended the vicinity today, following the same route of locations as previously described. At 13:15 hours I encountered a moderate landfill odour (3 out of 6) centred on the junction of Gadwall Croft and Barnacle Place. Although I expect that changing weather conditions will shortly dissipate this observed odour.																																																												
03-12-2020	12:55 to 14:05	<p>I carried out odour monitoring between 12:55 and 14:05. The weather was mainly dry with some light rain, light cloud cover, temperature was 1.5-2c, snow and ice on the ground, initially there was no wind but latterly a slight breeze was detected from West to East strength 1 from approximately 13:35. Due to the icy conditions, some residential streets were not monitored.</p> <p>I have tabulated the results of my findings as follows:</p> <table border="1"> <thead> <tr> <th>Location</th> <th>Odour detected</th> <th>Odour type</th> <th>Comment</th> </tr> </thead> <tbody> <tr> <td>Newcastle town centre – roundabout at junction of A34 and A519 (Morrisons supermarket), to junction of A34 and A53 (Aldi supermarket)</td> <td>3/6</td> <td>Landfill gas</td> <td>12:55 Detected whilst driving with windows down</td> </tr> <tr> <td>Silverdale Road</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Cemetery Road</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Maries Way</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Newcastle Street</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Bridge Street</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Crown Street</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Church Street</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Sneyd Terrace</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>High Street</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Vale Pleasant</td> <td>No</td> <td>N/A</td> <td></td> </tr> <tr> <td>Galingale View</td> <td>4/6</td> <td>Landfill gas</td> <td>13:25</td> </tr> <tr> <td>Greylag Gate</td> <td>4/6</td> <td>Landfill gas</td> <td>13:30</td> </tr> <tr> <td>Traffic lights at junction of Keele Road and Galingale View</td> <td>No</td> <td>N/A</td> <td>13:32</td> </tr> </tbody> </table>	Location	Odour detected	Odour type	Comment	Newcastle town centre – roundabout at junction of A34 and A519 (Morrisons supermarket), to junction of A34 and A53 (Aldi supermarket)	3/6	Landfill gas	12:55 Detected whilst driving with windows down	Silverdale Road	No	N/A		Cemetery Road	No	N/A		Maries Way	No	N/A		Newcastle Street	No	N/A		Bridge Street	No	N/A		Crown Street	No	N/A		Church Street	No	N/A		Sneyd Terrace	No	N/A		High Street	No	N/A		Vale Pleasant	No	N/A		Galingale View	4/6	Landfill gas	13:25	Greylag Gate	4/6	Landfill gas	13:30	Traffic lights at junction of Keele Road and Galingale View	No	N/A	13:32
