Environment Agency

## **EPR Compliance Assessment Report**

Report ID: 61563/0426338

This form will report compliance with your permit as determined by an Environment Agency officer								
Site	Grange Landfill			Permit Ref	61563			
Operator/ Permit holder	Grange Landfill Limited							
Date	01/06/2022			Time in	10:50	Out	12:00	
What parts of the permit were assessed	See below							
Assessment	Site Inspection	EPR Activity:	Installation	Waste Op X	Wate	Water Discharge		
Recipient's name/position	Robert Couldwell							
Officer's name	Roy Thompson			Date issued	08/	06/202	2	

## Section 1 - Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations (EPR). A detailed explanation and any action you may need to take are given in the "Detailed Assessment of Compliance" (section 3). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our <u>Compliance Classification Scheme</u> (CCS). CCS scores can be consolidated or suspended, where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your <u>local office.</u>

Permit Conditions and Com	Permit Conditions and Compliance Summary			
a) Permitted activities	1. Specified by permit	A		
b) Infrastructure	1. Engineering for prevention & control of pollution	Α		
	2. Closure & decommissioning	N		
	3. Site drainage engineering (clean & foul)	Α		
	4. Containment of stored materials	N		
	5. Plant and equipment	А		
<b>c)</b> General management	1. Staff competency/ training	Ν		
	2. Management system & operating procedures	N		
	3. Materials acceptance	N		
	4. Storage handling, labelling, segregation	Ν		
d) Incident management	1. Site security	Ν		
	2. Accident, emergency & incident planning	N		
e) Emissions	1. Air	N		
	2. Land & Groundwater	N		
	3. Surface water	N		
	4. Sewer	Ν		
	5. Waste	Ν		
f) Amenity	1. Odour	Α		
	2. Noise	А		
	3. Dust/fibres/particulates & litter	Α		
	4. Pests, birds & scavengers	А		
	5. Deposits on road	А		
g) Monitoring and records,	1. Monitoring of emissions & environment	Ν		
maintenance and reporting	2. Records of activity, site diary, journal & events	N		
	3. Maintenance records	N		
	4. Reporting & notification	N		
h) Resource efficiency	1. Efficient use of raw materials	N		
	2. Energy	Ν		

environmental permit conditions from Part 3 of schedule9 EPR (see notes in Section 5/6).

Number of breaches recorded		Total compliance score (see section 5 for scoring scheme)	0		
If the Total No Breaches is greater than zero, then please see Section 3 for details of our proposed enforcement response					

## Section 2 – Compliance Assessment Report Detail

This section contains a report of our findings and will usually include information on:

- the part(s) of the permit that were assessed (e.g. maintenance, training, combustion plant, etc)
- where the type of assessment was 'Data Review' details of the report/results triggering the assessment
- > any non-compliances identified
- > any non-compliances with directly applicable legislation
- details of any multiple non-compliances

- information on the compliance score accrued inc. details of suspended or consolidated scores.
- details of advice given
- any other areas of concern
- all actions requested
- any examples of good practice.
- > a reference to photos taken

This report should be clear, comprehensive, unambiguous and normally completed within 14 days of an assessment.

Site visit arranged to review the extent of preparatory works currently being undertaken on site and the engineering works and timescales when these are likely to be completed.

This was an announced routine site inspection and carried out in the presence of Robert Couldwell and John Whyke (TCM).

The number of vehicles observed arriving on site today have significantly reduced compared to my previous visit in March. Therefore, whilst a smaller number of vehicles are arriving on site, it is possible for these vehicles to drive up on to the engineered bund, reverse and deposit waste, rather than being off-loaded adjacent to the compound. Obviously if numbers increase then it is likely that vehicles will revert to being off-loaded adjacent to compound. Robert confirmed that the waste currently coming onto site is from the same single source as previously notified.

Evidence that bowers was in operation on site to minimise the risk of dust. Also noted that vehicles entering the site were observing speed limits to minimise dust.

A visual inspection of the waste being deposited for use in the construction of engineered bunds around Cell 1 was undertaken, this confirmed that appropriate clean inert wastes are being utilised as part of these works.

Advised John to continue with visual inspection of material being used and remove any oversize or clods that are observed and condition (i.e. add water) to aid compaction if soils become too dry. Any oversize material removed from the load is being stockpiled on site for use on haul road as the site develops or discarded over the inner flank of the bund.

Work continuing raising the northern section of the engineered bund. Survey pegs around the bund indicate remaining heights to be achieved. The bund on the north-eastern sections is almost at final levels, whilst the north-western section still requires further lifts. It is anticipated that within the next two weeks that work on trimming back/dressing of the outer flanks of the engineered bund will commence. The stockpiles of clean soils that have been placed within the centre of the cell will be removed and utilised in the dressing of the flanks.

Queried with Robert on the timescales for submitting amended bund drawings, he will chase up Arley Consulting and get these submitted as soon as possible.

As reported in my previous CAR (Report ID 61563/0420519) there is no secure compound on site for plant equipment. Discussed with Robert that some form of secure compound will need to be replaced to minimise risk of damage to plant and equipment when site is unoccupied. Robert confirmed that he will consider what additional measures can be put in place. Any change to current security proposal around the compound area as specified in Section 10.1 of the EMS will need to be formally approved.

Discussed with Robert that reinstatement of BH05 needs to be overseen by CQA engineer. CQA Plan for BH05 installation will require submitting, if you seek approval to use previously agreed construction proposals for this installation this will need to be formally agreed in writing.

Reiterated that replacement of the stock proof fencing on the eastern boundary of the site will be necessary before waste disposal activities commence.

The surface water infrastructure installed around the site still required to be CQA validated, therefore it is essential CQA Engineers undertake an assessment of the works currently being undertaken in accordance with Section 4 of the Surface Water Drainage Construction Proposals and CQA Programme agreed in accordance with pre-operational condition 3.

No mud was evident on haul road leading to main highway at the time of entering or leaving the site. During the inspection there was no evidence of dust leaving the site.

## Section 3- Enforcement Response

Only one of the boxes below should be ticked You must take immediate action to rectify any non-compliance and prevent repetition. Non-compliance with your permit conditions constitutes an offence\* and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.

*Non-compliance with MSA, MSB & TCM do not constitute an offence but can result in the service of a compliance, suspension and/or revocation notice.			
Other than the provision of advice and guidance, at present we do not intend to take further enforcement action in respect of the non-compliance identified above. This does not preclude us from taking enforcement action if further relevant information comes to light or advice isn't followed.	х		
In respect of the above non-compliance you have been issued with a warning. At present we do not intend to take further enforcement action. This does not preclude us from taking additional enforcement action if further relevant information comes to light or offences continue.			

We will now consider what enforcement action is appropriate and notify you, referencing this form.

Section 4- Action(s)				
Where non-compliance has been detected and an enforcement response has been selected above, this section summarises the				
steps you need to take to return to compliance and also provides timescales for this to be done.				
Criteria	CCS	Action Required / Advised	Due Date	
Ref.	Category	Action Required / Advised	Due Date	
See Section 1 above				

## Section 5 - Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- advise on corrective actions verbally or in writing
- require you to take specific actions in writing
- issue a notice
- require you to review your procedures or management system
- change some of the conditions of your permit
- decide to undertake a full review of your permit

Any breach of a permit condition is an offence\* and we may take legal action against you.

• We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.

• Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and or suspension or revocation of the permit.

• A civil sanction Enforcement Undertaking (EU) offer may also be available to you as an alternative enforcement response for this/these offence(s).

## See our Enforcement and Civil Sanctions guidance for further information

\*A breach of permit condition **MSA**, **MSB** & **TCM** is not an offence but may result in the service of a notice requiring compliance and/or suspension or revocation of the permit.

This report does not relieve the site operator of the responsibility to

- ensure you comply with the conditions of the permit at all times and prevent pollution of the environment
- ensure you comply with other legislative provisions which may apply.

#### Non-compliance scores and categories

CCS category	Description	Score
C1	A non-compliance which could have a <b>major</b> environmental effect	60
C2	C2 A non-compliance which could have a significant environmental effect	
C3	A non-compliance which could have a <b>minor</b> environmental effect	4
C4	A non-compliance which has <b>no</b> potential environmental effect	0.1

**Operational Risk Appraisal (Opra)** - Compliance assessment findings may affect your Opra score and/or your charges. This score influences the resource we use to assess permit compliance.

#### MSA, MSB & TCM are conditions inserted into certain permits by Schedule 9 Part 3 EPR

**MSA** requires operators to manage and operate in accordance with a written management system that identifies and minimises risks of pollution.

**MSB** requires that the management system must be reviewed, kept up-to-date and a written record kept of this.

**TCM** requires the submission of technical competence information.

### Section 6 – General Information

### Data protection notice

The information on this form will be processed by the Environment Agency to fulfill its regulatory and monitoring functions and to maintain the relevant public register(s). The Environment Agency may also use and/or disclose it in connection with:

• offering/providing you with its literature/services relating to environmental matters

• consulting with the public, public bodies and other organisations (e.g. Health and Safety Executive, local authorities) on environmental issues

- carrying out statistical analysis, research and development on environmental issues
- providing public register information to enquirers
- investigating possible breaches of environmental law and taking any resulting action
- preventing breaches of environmental law
- assessing customer service satisfaction and improving its service
- Freedom of Information Act/Environmental Information Regulations request.

The Environment Agency may pass it on to its agents/representatives to do these things on its behalf. You should ensure that any persons named on this form are informed of the contents of this data protection notice.

## **Disclosure of information**

The Environment Agency will provide a copy of this report to the public register(s). However, if you consider that any information contained in this report should not be released to the public register(s) on the grounds of commercial confidentiality, you must write to your local area office within 28 days of receipt of this form indicating which information it concerns and why it should not be released, giving your reasons in full.

## **Customer charter**

# What can I do if I disagree with this compliance assessment report?

A permit holder can challenge any part of the CAR form by writing to the Environment Agency office local to the site within 28 days of receipt. If the issue cannot be resolved by the local office, a permit holder can raise a dispute through our official <u>complaints procedure</u>.

If you are still dissatisfied, you can make a complaint to the Ombudsman. For advice on how to complain to the <u>Parliamentary and Health Service Ombudsman</u> phone their helpline on 0345 015 4033.
